

MEADOWSLEA ANGUS 9TH ANNUAL FEMALE AND EMBRYO SALE

**ON-LINE AND ON-FARM
APRIL 30TH 2025 – 1PM**

www.meadowslea.co.nz

MEADOWSLEA
ANGUS & SHEEP GENETICS

100 YEARS
OF STUD BREEDING

OFFERING:

92 R2yr Stud Angus Heifers

20 R3yr Stud Angus Heifers

20 R4yr Stud Angus Cows

20 10yr old Capital Stock Angus Cows

10 Embryos

FERTILITY AND MATERNAL TRAITS the key to profitability in any herd!

Meadowslea stud cows winter on unimproved native tussock blocks without supplements being fed. This challenging environment tests the ability of the pregnant cow to maintain condition through periods of winter feed shortages. It is the energy stored in her rib fat levels that enable her to survive, thrive, and ultimately get back in calf and rebreed each year.

Days to calving is a crucial fertility trait that measures the number of days from when the bull is let into the mob until the cow calves. This identifies cow families that calve early every year. Those earlier calves will always be heavier at weaning, and selecting for short Days to Calving will reduce later born calves and allow higher conception rates in a shorter mating period.

"At Meadowslea we have always had some of the highest rib fat levels in the Angus breed. The importance of these fat levels is now recognised with our cattle now having some of the shortest days to calving EBVs in Australasia."

David Giddings

GOOD FAT COVER AND EASY-DOING ABILITY

Meadowslea stud 18mth in-calf heifers showing good fat coverings and ready to winter on the hill.

Meadowslea cows and calves come down off the hill for weaning.

A cow's condition and her ability to lay down fat in times of surplus, and to draw on that fat as an energy source in times of feed deficit is vitally important. This rib and rump fat is the cheapest and most efficient energy store on the farm, and will determine the ability of the herd to get back in-calf and rebreed early after a hard winter or difficult spring.

All Meadowslea yearling heifers are mated and any dries culled. After calving these heifers are run in mating mobs together with mixed age cows and expected to get back in calf early, rear a good calf off the tussock, and stay in good order. This is a tough ask for a first-calver, but this year that age-group scanned with a terrific 97% back in-calf rate!

A cow going into winter with good fat coverings carries an energy store on her back equivalent to approximately 2 bales of baleage.

The Meadowslea herd has natural rib and rump fat levels amongst the highest in the breed in Australasia – acknowledged as a key trait for fertility in the harsh environment.

Meadowslea Ninth Annual Female Production Sale

ON-LINE AND ON-FARM

State Highway 8, 23 Trotters Road, Fairlie
5km west of Fairlie

ON-LINE BIDDING OPENS

with video release on
Friday 25th April - 7pm

Paddock Inspection Invited at Anytime

Call David Giddings ph: 027 229 9760

HELMSMAN STYLE AUCTION

Wednesday 30th April - 1.00pm

Sale Format

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online. The sale will be hosted on our own **yourbid** platform and accessed through our website www.meadowslea.co.nz. Prior to the sale, all lots will be filmed and available for viewing up until sale day on the Meadowslea website.

The cattle are available for viewing in the paddock anytime

– just call 0272299760 to arrange a time.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Meadowslea website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid. Buyers registering online will receive a buyer number in their email which will automatically accompany each bid they place, whether they do so at home on their computer, or through their smart phone while in attendance. Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the auctioneers. All live bids and all lots will be visible at all times, both online and on a big screen on-farm.

Online registration is available NOW and we encourage everyone to visit our website www.meadowslea.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

The Online Open Day video will be released on our website and on Facebook on Friday 25th April at 7pm. This video will include footage of every bull in the catalogue with expert comments from genetic specialists and will be available for viewing right up until the sale.

Online bidding will be open from 7pm on Friday 25th April until the conclusion of the sale.

On Sale Day, April 30th, the on-farm registration and bidding will open at 11am.

Livestreaming with interactive viewing will commence at 12.30pm with a walk through of all the pens with commentary from the vendors and genetic specialists. Requests to review particular cattle can be made through the comments section of the web-site chat room or by telephone or text to the vendors or stock agents in attendance. This will continue throughout until the conclusion of the sale.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours:

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours

Example:

\$2500 Displayed in Red denotes the Vendor's reserve and indicates there has been no bid

\$3000 Displayed in Blue means an active bid has been received

\$3500 Orange highlight indicates a new Bid has been received within the last 2 minutes on this lot

\$3500 The holder of the leading bid will have the lot number highlighted in green on their computer or their smart phone

The sale will run until 2pm on April 30th. After this time the sale will conclude once there has been a period of at least 2 minutes without a bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes. This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.

Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.

All updates will be posted on our website, as will an up-to-date version of this document.

Rebate purchasing Commission. Hazlett livestock will be in attendance and be booking the sale

1. A 6% rebate commission will be paid to all nominated stock firms provided the vendor is advised of the purchaser's intention to buy before the commencement of the on-farm sale, or before the purchaser commences bidding online.
2. A 3% rebate paid to the nominated buying company when the vendor has NOT been advised of the purchaser's intention to buy prior to the commencement of the on-farm sale or before the purchaser commences bidding on line

Disclaimer: The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither AngusNZ nor ABRI oversee or audit the collection of this data.

FOREWORD

Meadowslea Angus Stud was established in 1985 with the purchase of 6 capital stock heifers from Australasia's oldest Angus stud, Turihaua, north of Gisborne. We have steadily expanded ever since to meet strong demand for bulls from the hill-country market we target – our belief is that an animal must first and foremost be suitable for the environment it is run in.

With the additional lease of a neighbour's property 9 years ago and the recent purchase of Punaroa Downs next door we have been able to continue increasing stud cow numbers and this season have mated 730 stud females.

The demand for our bulls has steadily increased with 170 bulls sold at auction in 2024. Nine years ago, with a confident beef industry and the lease block fully stocked, we held our very successful first annual female auction. We now plan to stabilize at around 500 cows and sell a similar number, and age-group breakdown, every year going forward. The longevity, fertility, constitution, and structural soundness of our female cattle are crucial for us to present the number of females in this catalogue. We have very few dry cows and minimal losses to breakdowns or poor constitution because our cows are the right type to handle their environment.

This means fewer replacements are required and more quality surplus females are available to sell.

At Meadowslea all yearling heifers are mated. The decision around which to sell and keep was made in February with relatively limited information on the young female cattle, since we did not yet know how they will perform in the herd. No doubt many of these young females we are offering will turn out to perform as well as, or better than some we are keeping ourselves! Clients purchasing these females in the past 8 years have been very satisfied with their performance and each year we have had many repeat buyers. We offer these females for sale with complete confidence, and in particular the annual draft cows are true capital stock having done up to 10 years on the hill, survived droughts and snowstorms, without ever being fed supplements. These "L" cows include the fourth age-group of daughters born to our most influential sires Meadowslea F540 and Turihaua Crump, and carry industry leading maternal and fertility traits with tremendous longevity. They also include the third age-group of daughters of Goldwyn 017 who is also a trait leader for fertility and has IMF in the top 1% for the breed.

As you read this catalogue it will become clear that the animals that perform the best in our environment are of a similar type – strong rib fat levels drive our programme forward for two reasons. It is strongly linked to fertility, early puberty and the ability to calve early and re-breed early over a lifetime. Secondly, it is the energy store the females use to get through the feed shortages and extended stress periods all too common in this harsh environment. **It is significant that the average rib fat EBV of all females on offer is +2.4 ranking them in the top 20% for the breed. The average for the all-important fertility trait of short-days-to-calving at -5.4 days also ranks the sale females in the top 20% for the breed.** High-growth females do not work well in our hill-country environment and you will see few in the catalogue, as over time they have failed to perform and so have dropped out of the herd.

When selecting cattle for our own breeding programme, the key figure we look at is the Self Replacing Index, which we find works well at identifying cattle that can perform and produce on hill country. We strongly suggest clients buying females – and bulls as well for that matter – do the same, in order to sustain a productive and profitable cow herd. The next most important figures are the Days to Calving – the key measure of cow fertility – and Rib Fat, which identifies the easy doing animals that can thrive in the hill country environment.

After a couple of bumper growth seasons in South Canterbury, the very dry conditions of early 2024 served as a sharp reminder of the type of animal that thrives in this environment, and that which doesn't. It has been very gratifying to see how well these moderate framed cattle with big rib fats held their condition through the winter of 2024 and produced cracking calves despite tightly limited feed supplies.

All cattle offered have been scanned in-calf by Aorangi Vets Ltd. All dry cows have always been culled at Meadowslea. We individually mate all stud cows, with one bull per mob initially and change bulls over after approximately 30 days. Each cow or heifer is individually assessed and her mating sire carefully selected to optimise her conformation as well as her EBVs, so as to enhance her progeny's suitability for the hill-country environment.

FOREWORD

In 2024 we had 235 stud heifer calves born. We mated 230 as yearlings in 6 different mobs selected on pedigree, performance, and type. Some mobs were single mated while others had 2 yearlings in the second cycle. **The result was a 97% conception rate for the heifers while the 500 Mixed age cows achieved 98%.** This is a tremendous endorsement of the emphasis we place on the key fertility and maternal traits that are the main drivers for profitability in any beef herd.

We undertake DNA parentage testing for all stud calves and purchasers will need to do the same if they intend to register or generate EBVs on the progeny.

This is the ninth year we have we have offered our stud females to the industry, and almost all sires used are unique in the world to the Meadowslea herd. For stud breeders this is an opportunity to access out-cross bloodlines proven to be highly productive in the hill country, and for commercial clients the option to gain access to genetics that would not normally be available in their herds for 3 more years. From our perspective, the more of these bloodlines that are available in the industry here in NZ, the better the chances are of us being able to source sires that fit our breeding programme; a task that is becoming increasingly difficult with the NZ Angus gene-pool now so heavily influenced by genetics sourced from the USA and Australia. Feedlots drive most of the selection criteria for these imported genetics making them, in our experience, unsuitable for our NZ grass-fed sustainable hill-country production.

We wish you well with your purchases and stand behind these cattle 100%.

Regards,

David Giddings

An administration fee of \$100 per female will be added to all animals purchased for stud transfer. (This is to cover administration and any further gene testing requirements).

Please note: this is in addition to any transfer fees charged by the NZ Angus Assn.

EBV tables in this catalogue represent the top ■ 15% and ■ 30% for each trait except where Mature cow weight is shaded it indicates ■ desirable for under 600 Day weight and ■ exceptional for under 400 Day weight.

Comments: A second Rainstorme very similar to the last. This time out of a cow by Red Oak with strong NZ bloodlines sold in the 2024 female sale. Exceptional calving ease and low birthweight once again, with good early growth, milk, scrotal, and fat. Her actual EMA and IMF scans were right up there, and she again has a good index. Nicely balanced, upstanding, with clean shoulders. Mated the same way to T234.

MEADOWSLEA MARK 100 YEARS OF STUD BREEDING

2025 marks a significant milestone for the Giddings family of Fairlie as they celebrate a century of breeding Romney sheep on the same Meadowslea property.

It was 1925 when Gilbert Giddings then still a teenager took the train to Gore and purchased 40 stud Romney ewes. He wasn't old enough to have them registered in his own name and so the first Meadowslea Romneys were registered in his mother's name – Mrs Sarah Giddings.

The stud today is run by Gilbert's son David and his son George. George has a 1-year-old son named Gilbert all living on the Meadowslea property.

The Meadowslea Stud sheep flock currently consists of around 3000 recorded ewes run over 4 properties. As well as the base Meadowslea Romney flock, the operation now includes worm resistant Kiki South Romneys, Romdales, Texel x Romney, Perendale x Texel x Romney, Kelso x K Romney, as well as a black face Terminator breed. All the breeds are run entirely unshepherded with high survival, and low input easy care, the cornerstone of the breeding programme.

MEADOWSLEA ANGUS HISTORY

In 1986 David Giddings met Hamish Williams from Turihaua Angus at a Romney stud dispersal sale in Otago. Hamish was establishing a Romney stud at the time, and the conversation that followed led to a reciprocal agreement to exchange capital stock young females over a 3 year period. In 1987 Hamish travelled to Meadowslea and picked 20 in lamb stud Romney 2th ewes, and David visited Turihaua and selected 6 in calf capital stock 2yr heifers. These foundation females were wonderful traditional NZ bloodlines, at a time when the bigger framed USA genetics were becoming increasingly popular with Angus breeders in NZ.

David says at the time he had no idea these were some of the only capital stock females to ever be sold from Turihaua and the Giddings family are eternally grateful to the Williams family for the incredible opportunity. From those original 18 heifers, Meadowslea Angus has grown to be mating 720 stud females annually, as well as holding NZ's biggest annual female production sale. This has all been possible due to the incredible fertility and structural soundness of the Turihaua herd, which was an industry leader in mating 2yr heifers back in 1987.

David says while there have been massive changes in breeding and performance over all those years, some things haven't changed at all, with the fundamentals of structural soundness, strong constitution, and fertility, as relevant today as they were back in 1925.

NEW SALE SYSTEM CELEBRATES ITS 5TH BIRTHDAY

Yourbid, the online Helmsman auction system developed by Meadowslea Genetics of Fairlie, celebrates its fourth birthday with the stud's upcoming In-Calf Angus Female Sale on May 1st.

The stud holds 7 on-farm sales a year across their sheep and Angus cattle breeding operations, including the annual in-calf sale in early May. In 2020, this date fell within NZ's Level 3 Covid lockdown, during which no crowds or gatherings were permitted, making an outcry auction impossible.

With feed supplies tight and meat processing capacity limited, deferring the sale really wasn't an option either, meaning the only way forward was to hold it online. After looking at the various options available, the Meadowslea team decided to design their own from the ground up.

After running helmsman sales for many years for ram sales and in-lamb ewe sales previously, David and son George Giddings could see how an online helmsman sale would work very well for stud stock. They were able to provide a webdesigning friend with a specific brief, and a week or so later Yourbid came into being. The sale was very strong, with spirited bidding from around New Zealand, despite no buyers being in attendance at all.

Since that first sale in 2020, Meadowslea have run 20 successful sales for their own stock, as well as a number of sales for other stud breeders in NZ and Scotland. The system has proven very popular with stud-stock buyers, giving them the extra time to consider their purchases carefully, and the option of buying in choice order rather than lot number order.

As well as that first female sale, Meadowslea has run 2 bull sales, an online semen sale, and 3 ram sales on Yourbid. Yourbid has been used very successfully for studstock sales in Scotland, and the Giddings family have received enquiry from breeders keen to use it from around New Zealand as well as in Australia, France, the US and as far afield as Romania. 3 other ram breeding operations have used it in New Zealand this summer, with a number of bull sales confirmed for the upcoming season and many more interested in switching to it over the next few years.

Online helmsman-style auction

Yourbid works as a Helmsman-style auction - meaning all lots are offered for sale simultaneously.

Other online livestock sales platforms in New Zealand use the traditional sequential auction model, whereby each lot is sold one at a time, one after the other. Yourbid uses the "Helmsman" style of auction. This means that all the lots on the sale are open for bidding at the same time, which is helpful for both buyers and sellers, particularly when conducted online. Bidding is also kept open over a period of several days, rather than the minute or so per lot of a conventional auction.

A key difference of this platform compared to any other the developers have seen is the bidding screen which shows the current prices of all lots simultaneously. Reserve prices are shown in red for a start, this changes to blue once the first bid is received, and the buyer number of the current leading bidder is displayed. New bids are highlighted in orange for a minute. Buyers who are logged in on their own device see the lots they hold highlighted in green. This gives an instant overview of the auction so anyone can see on which lots the activity and interest is, making it easy to establish their relative market values.

All online models have some level of time delay between when events happen on-site and when they are seen by remote buyers. For a traditional sequential auction a delay of 15-20 seconds can be very significant, when each animal might only be in the ring for 90 seconds or so. By keeping the entire auction open for a longer period of time this problem is mitigated significantly. It also means sales will not be affected significantly by any temporary technological glitches.

Giving buyers time

Selecting seedstock is a major decision for sheep and beef farmers, and one which will have ramifications on their operations for years to come. People need time to gather and process information to make decisions. This is even more important when buying remotely, when information gathering is more difficult and takes time – meaning remote buyers are significantly disadvantaged at an online sequential auction. The Yourbid system gives buyers this extra time, and

by integrating the bidding on the website alongside the online catalogue, videos of each lot and a live commentary, this information is readily available to buyers. Rather than turning up on a given day and viewing all the animals in that tight time-frame, buyers can go through the catalogue, view the videos, make selections, and bid at their leisure from home over the period of several days the sale is open.

Bidding order of preference

Another advantage of a Helmsman-style auction is that it allows buyers to bid on stock in the order of their preference, rather than the catalogue order. For instance, as a buyer you might be interested in lot 8 and lot 12. At a traditional auction, lot 8 comes into the ring and isn't selling for too much, however lot 12 is your first preference so you decide to wait for that animal to come into the ring. Lot 12 comes in, sells for too much money, and you can't go back and bid on lot 8 because that animal is sold. Under the Helmsman system buyers can chop and change throughout the bidding. Meadowslea have analysed the bidding data for the sales they have run already, and it is obvious that a lot of buyers will bid on a certain lot to a particular level, then change to another lot, then perhaps go back to the first, or move onto a third animal they like. Some buyers bid on as many as 8 different animals to get the one they wanted – in a conventional auction they would have missed out completely or ended up with one that wasn't in their top-10 at all. By running the auction over a longer period, those who missed out on their first choice were able to go back through the videos and catalogue (or back through the pens for those who were actually onsite) and pick another animal they were satisfied with.

Integrating on-farm and online bidding

Integration of on-farm and on-line bids is crucial to the success of a platform like this. This system works by having large TVs on-farm displaying the bidding screen. Buyers on-site can bid through their smart phones, and those bids are displayed in real time. Some buyers will still prefer to attend on-farm and bid using pieces of paper as per a traditional Helmsman sale – they write their buyer number, their lot number, and the bid price on a piece of paper and hand it in – they are able to enter this directly into the online system so it shows up on-screen in real-time as well.

Engaging with potential buyers

By providing a live-chat on the platform, potential buyers are able to ask questions, request another closer view or more information about a particular lot, and even send through jokes and one-liners. Online videos and the livestreamed commentary are produced through Facebook Live. All this makes for a much more engaging and entertaining environment for the buyers, compared to what many feel are the sterile and austere atmospheres of some of the other established online platforms.

Yourbid invite enquiry from breeders, agents and commercial farmers interested in using the platform, and envisage it becoming an independent platform able to be used by all industry players.

All enquiries to george@yourbid.org or call **David 027 2299760**

ANGUSNZ EBV'S AND SELECTION INDEXES

EBVs and Selection Indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) to provide the best measure of an animal's genetic merit.

To ensure the accuracy of EBV and Index data, AngusNZ combine with Angus Australia to create a reference population known as the TransTasman Angus Cattle Evaluation (TACE).

By using TACE – along with visual and structural appraisal – will assist in creating a balanced phenotypical and genotypical breeding outcome.

SELECTING YOUR NEXT ANGUSNZ SIRE

1. Consider your individual EBVs of importance
2. Consider other traits of importance (e.g. visual assessment)
3. Identify the AngusNZ selection index of most relevance to your breeding programme
4. Rank animals using the chosen Selection Index.

The majority of these steps can be undertaken online at www.angusnz.com, allowing you to generate a shortlist of bulls ahead of sale day. Alternatively Beef & Lamb Genetics have developed a new tool to make it easier to find the best bulls for your farming operation. Using a series of buttons and sliders, you refine your breeding objectives, then click a button and nProve generates a list of bulls that best fit. It's free to use, there's no need to register and there's also helpful tips to get started.

Try it out at
www.nprove.nz

AngusNZ Individual EBV's – Please note: Only EBVs from the same TACE analysis can be directly compared.

GROWTH

200, 400 & 600 Day Weight EBVs (kg) – Larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

Mature Cow Weight (kg) – Larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self-replacing or maternal production systems.

Milk (kg) – Higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

FERTILITY & BIRTH

Calving Ease Direct (%) – Higher (or more positive) CEDir EBVs indicate 2 year old heifers will have less difficulty calving this sire's progeny.

Calving Ease Daughters (%) – Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at 2 years.

Gestation Length (days) – Lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

Birth Weight (kg) – Lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

Days to Calving (days) – Lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval date to calving.

Scrotal Size (cm) – Larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

CARCASE

Carcase Weight (kg) – Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcass weights.

Eye Muscle Area (sq. cm) – Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm) – Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcass weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (%) – Bulls with higher (or more positive) RBV EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat (%) – Higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

OTHER EBVS

Docility (%) – Higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

AngusNZ Selection Indexes

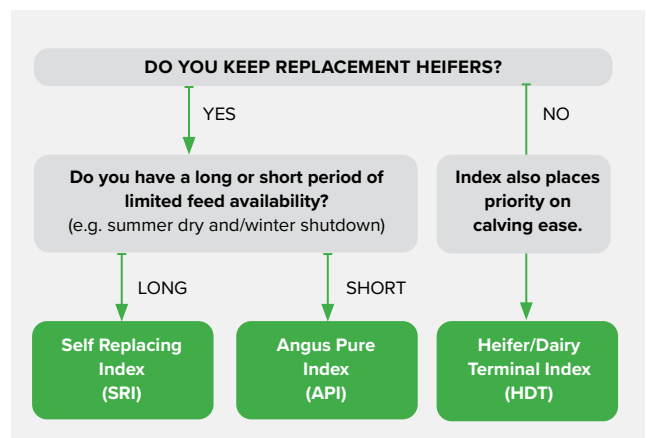

AngusNZ currently has three different selection indexes. These are:

1. Self Replacing Index
2. AngusPure Index; and
3. Heifer/Dairy Terminal Index

Each selection index is reported in units of net profitability/cow mated (\$), and relates to a commercial herd using Angus bulls. Each index is focused on efficient beef production, including maternal traits where appropriate.

Comments: Recognised as one of NZ's most influential and long-lasting senior sires of recent times. He has over 450 progeny in 21 herds in both NZ and Australia and is a trait leader for the important fertility EBV of short days to caving at -9.1 days. Traditional NZ Angus hill country type with proven industry leading fertility. His grandson Meadowslea Mountain Man was the highest selling 2-year-old bull in NZ in 2020 and sons and grandsons have sold for up to \$92,000 at studs across the country. His daughters and granddaughters are the top breeding females in our herd and are proving exceptionally fertile and productive in our hill country, resulting in him now achieving a self-replacing index in the top 10% for the breed. He has a major influence in this sale including the last of his 10-year-old daughters on offer, and his bloodlines are behind almost all the females catalogued.

Comments: F540 continues to have a huge influence on our herd with exceptional longevity to 13 years old. He has been used successfully in many breeding programmes with over 300 progeny in 12 herds in NZ and Australia. Deep, thick, easy-doing sire with exceptional production figures for hill country. He has strong maternal and fertility traits and is a trait leader for both short gestation and milk, while his short days-to-calving, rib and rump fats, and IMF all feature in the top 10% for the breed. His daughters are outstanding in the herd weaning thumping calves while maintaining their condition all year round, a real testament to his easy doing traits. He features strongly in this catalogue including the last of his 10yr daughters on offer, and numerous daughters and granddaughters throughout the sale.

Comments: The top Goldwyn bull of his year and purchased for \$13,000. A son of the widely used Te Mania Infinity and out of the top price cow at the Goldwyn stud dispersal sale. He is passing on very strong fertility and maternal traits and this is reflected in his daughters' conception dates, resulting in him becoming a trait leader for short days-to-calving at -9.2 days. He has several good daughters and numerous granddaughters in the sale all exhibiting the same great fertility and displaying his exceptional IMF, which at +4.6 ranks him in the top 1% for the breed.

Comments: There is no doubt why we named this fellow Meat Machine, and he has become an all-time favourite sire. We now have over 200 progeny, and he is having a huge impact in the herd. He leaves terrific thickness and depth with great hindquarters. He passes on the easy-doing ability we value so strongly, and this shows in his exceptional rib and rump fats which are almost off the scale for the breed. He has very strong calving ease with super low birthweight with an incredibly efficient low mature cow weight. We believe he is the true Angus hill-country type and this is endorsed with an SRI index in the top 10% for the breed. He features strongly in the catalogue with plenty of daughters and granddaughters on offer. His outstanding son R818 is following in his father's footsteps!

----------------	----	--------	----	--------	-------------------------	-------

Comments: Retained in the stud in 2018, M564 is a son of F540 and out of our record-breaking cow G1000, who was sold to Australia in our 2021 female sale for \$16,000. She was sired by the high-performing Glanworth 08-16, and she scanned with the biggest EMA of her year group with an EBV figure of +13.3. We selected M564 to use as a yearling after he had scanned with the biggest EMA ever recorded in the stud and he has consistently passed this trait on to over 100 progeny scanned in 14 stud herds throughout NZ. His data set is very impressive for profitable efficient beef production in NZ hill-country. He has, short gestation with moderate birthweight followed by strong early growth to 400 days, then levelling off to give the moderate efficient cow size needed in our environment. He has exceptional carcass traits that are hard to find in traditional NZ bred bulls with both EMA and IMF ranking in the top 10%, while his easy doing fats sit in the top 1%. All this data combines to generate a self-replacing index in the top 5% for the breed in NZ. M564 has some top selected young daughters and granddaughters on offer as well as being used as an AI sire over some of the very best females in the catalogue.

Comments: We retained this sire in 2019 and rate him as possibly the best Turihaua Crump son ever! He is out of a top-performing Glanworth 16 cow who was sold in our 2021 Female Sale to Australia for \$9,300. She also bred our top price bull in 2018 - M429, sold to Red Oak Stud for \$18,000. The first of the N166 sons were the standout feature of our 2022 bull sale including Meadowslea Mountain Man R705, sold to KJ Angus for \$92,500 and achieving the top price in NZ for a 2-year bull in 2022. His progeny display exceptional quality with terrific power and strength. He has some exciting daughters on offer and also features as a mating sire throughout the catalogue.

Comments: We retained P700 in 2020 after using him over stud heifers as a yearling. He was one of many outstanding sons of L226 and we selected him for his strong fertility traits and compact moderate frame packed full of meat. He excels in all the traits we value in the hill country with calving ease, low birth weight and efficient moderate cow size. He has exceptional maternal and fertility traits with scrotal size, and rib and rump fats all in the top 10% for the breed. His progeny always scan terrifically well for IMF ranking him in the top 1% for the breed with an EBV of +4.6 His mother is a lovely moderate framed 11-year-old cow offered at lot 105 in our 2022 sale. The first of his sons were the feature of our 2023 bull sale including the top price to Mt Possession Angus and another to Glen R Angus, all with the same exceptional IMF figures. He has 2-year daughters on offer and is also a mating sire in this catalogue.

Comments: P674 was sold in our 2020 bull sale for \$18,000 to Dovedale. His full brother N141 was the top price bull in the 2019 sale sold to Waimara Angus at \$22,000. We retained semen in P674 recognising that he was double-bred to Braveheart and had inherited his very strong EMA. With Meat Machine as the sire of the dam he is bred to be thick, deep, and square and he is certainly passing this on to all his progeny. He has a great spread of figures and is in that sweet spot we like for moderate frame, fertile, easy doing cattle in hill country. He has the efficient moderate cow size figure we aim for below his 400 day, and this is recognised with a self-replacing index in the top 5% for the breed. He is breeding exceptionally well with a son at lot 1 in the 2024 bull sale selling at \$20000 to Glen R Angus, and T234 being retained in the stud. He has been used as an AI sire over selected sale cows as well as having some exceptional young daughters on offer.

Comments: Q178 was our top keeper in 2021 and we rate him as one of the best bulls we have ever bred. He is a son of Rangatira 16209 who bred an outstanding line of bulls for us in the 2021 Bull Sale, with sons selling to \$32,000. He displays exceptional depth of body, with a powerful head, bone, and very good feet. He has a superb hindquarter and wonderful temperament. He has a good balance of figures for hill-country with strong fertility, recording short days to calving figures in the top 10% for the breed. This bull has attracted much interest with strong semen sales to some of the leading studs in NZ as well as sales to Australia and USA. The first of his 2yr sons were a real feature of our 2024 bull sale. He has some top young daughters on offer in this catalogue and also features as a mating sire.

Meadowslea Q178 - outstanding herd sire retained in the stud in 2021.

Comments: Quartz Q250 was also retained in 2021. He is a son of our high-performing carcass merit sire M564 and a grandson of our record price cow G1000 who was sold in our 2021 Female Sale to Australia. His mother is a 10-year-old Crump granddaughter who was sold in our 2024 female sale. Q250 is a lovely, well-balanced, moderate-framed bull who ticks a lot of boxes for hill country production. He has calving ease with low birthweight and moderate efficient mature cow size. His maternal and fertility traits are very strong with his scrotal size, milk and fats all ranking in the top 10% for the breed. He has inherited the good EMA coming through from his record-priced grandmother G1000 who's EMA is now in the top 1% in NZ at +13.3. Quartz also has IMF in the top 10% for the breed. A very sound bull with a great pedigree behind him. He has some top daughters on offer and was used as a mating sire.

Comments: We purchased Rebel at the final Rangatira Bull Sale in 2021 for \$35,000. For us he was the standout bull in the catalogue, both for his pedigree and his moderate, sound, deep body type. His sire is the high performing Turoa Maverick, who is a son of our own Turihaua Crump. His dam has bred exceptionally well, with a full brother to Rebel selling in the 2020 Rangatira bull sale for \$35,000. Rebel has all the quality and soundness attributes that the Rangatira herd was known for, and the first of his progeny coming through as R2yr olds look very impressive with some of the stand-out daughters on offer.

Comments: Purchased at the 2021 Turihaua bull sale, Tornado is a lovely moderate framed, wonderfully sound, traditional Turihaua type of bull. He has exceptional structural soundness, and wonderful feet and legs to give longevity of production. He exhibits strong muscle with a deep flank and very good hindquarter. We see a lot of similarity to Turihaua Crump in this bull and the first of his 2yr sons were very impressive in our 2024 bull sale. He has impressive daughters on offer and has been mated to some good cows throughout the sale.

Comments: Purchased at the 2021 Turihaua Bull sale, Jupiter impressed us with his superb structural soundness, scoring almost perfect 5s in the Beefclass scoring system. He is a deep bodied, moderate framed bull with exceptional muscle, and this is supported with a strong EMA figure in the top 10% for the breed. He has the important fertility trait of short days to calving ranking in the top 2% for the breed and the easy doing fats we rate so highly in the hill-country. All this combined with a very moderate mature cow weight generates a SRI index in the top 1% for the breed. The first of his R2-year progeny in 2024 were outstanding with 5 sons used as yearlings and one retained for stud duties. He has daughters on offer and is mated to a selection of top cows in the catalogue.

Comments: Purchased in May 2022 for \$81,000, Rainstorme is the most exciting sire we have used at Meadowslea. He ticks all the boxes for efficient beef production on hill country and has generated widespread interest from stud and commercial breeders in both NZ and Australia, with semen and embryo sales of over \$100,000 recorded to date. Rainstorme has the unusual combination of data that is backed up by viewing the bull himself. His massive EMA is visible in his exceptional loin and his easy doing ability with his strong fats is very evident. His wonderful smooth shoulder confirms his calving ease trait leader status and his massive scrotal is also industry leading. He now has over 260 recorded progeny across 22 herds in NZ and Australia and his exceptional data set has not altered. The first of his yearling sons were a real feature of our bull sale in October 2024. We have used 7 sons as yearlings to mate both stud heifers and cows. These Rainstorme sons are set to make a massive impact on the June bull sale. Rainstorme has the first of his very impressive R2yr daughters on offer as well as being mated to a selection of the feature females throughout the catalogue.

Comments: R818 was the outstanding Meat Machine son from the 2020 calf drop and was sold in our 2022 bull sale to Jade Park Angus in Australia for \$23,500. The bull has remained at Meadowslea and we are very fortunate to be able to use him. He has developed tremendously, and his depth and thickness have impressed all who have seen him. R818 has strong caving ease and low birthweight coming from the Meat Machine bloodline. He displays a very deep, wide hindquarter and a wonderful clean shoulder with great balance and outlook. R818 has the exceptional easy doing ability we value so strongly in the hill-country, with good rib and rump fats and the volume and capacity to handle the hardest conditions. The first of his 2yr sons from his yearling mating were very impressive in the 2024 bull sale, including T106 sold to Turihua Angus. He has a very strong line-up of sons for our 2025 bull sale. He has daughters on offer, as well as being used as a mating sire throughout the catalogue

Comments: R646 was retained in 2022 after being used as a yearling. His sire Meadowslea M429 was sold to Red Oak stud for \$18,000 and was a son of the \$100,000 bull Rangatira 13-38. The dam of M429 is the great old cow G922 who is also the dam of Meadowslea N166 and was sold to Ballanee Angus, Australia for \$9,300. The dam of R646 is a great cow by KayJay Freedom I36 going back to Braveheart. R646 has tremendous volume and thickness with very strong growth and good fertility traits. He has an exceptional muscle pattern with superb width across the loin and hind-quarter. His wonderful easy doing ability is clear to see with rib and rump fats in the top 10% for the breed. He has some outstanding Rising 2yr bulls that will feature very strongly in our June bull sale. R646 has daughters on offer as well as being used as a mating sire.

Comments: Tangihau T613 was purchased at the record-breaking 2024 Tangihau Bull sale. For us he was the standout bull there, with exceptional muscle and soundness in a moderate frame. Weighing in as one of the heaviest bulls on sale day at 850kg, he has now grown out to an impressive 900kg. Sired by the high performing Shian 18-563, who bred all the high priced Tangihau Stud bulls in 2023, his pedigree features the very successful cross of the Reality and Braveheart bloodlines. T613 displays exceptional 200-day growth, levelling out at the 600 day, and with the very efficient mature cow weight below his 400-day. Very strong muscle is matched with an exceptional hindquarter and immaculate feet and leg structure. T613 is a very complete bull with wonderful style, presence, and superb temperament. He features as a mating sire in the catalogue.

Comments: Atahua 59-22 was purchased at the final Atahua bull sale in June 2024. He was selected for his exceptional depth and thickness together with outstanding eye muscle area which ranks in the top 2% for the breed. He was sired by the \$60,000 Kaharau 589, who was a top Braveheart son of his year, and carries some of the best known Kaharau blood lines with Waihohonu 113 and Kaharau Class 790 featuring in the pedigree. His dam is a proven 11-year-old cow who produced 9 calves in 9 years. 59-22 is a moderate framed, deep bodied bull with strong calving ease, short gestation, and low birthweight. He has the very efficient moderate cow weight we look for, that is well below his 400-day. His scrotal size ranks in the top 2% for breed, as does his exceptional eye muscle area at +9.3. He has the easy doing ability we look for in the hill-country with good fats and IMF above breed average. This is a very well-balanced, stylish bull with true Angus quality head and bone, and a wonderful skin and coat. Atahua 59-22 has a wonderful data set for mating heifers to produce easy-doing efficient females for profitable hill-country beef production. He is mated to some of the feature heifers on offer.

Comments: Meadowslea T234 was retained in the stud in 2024. He was used as a yearling in 2023 to mate heifers together with his half-brother T172, who was later sold at lot 1 in our 2024 Bull Sale to Glen R Angus for \$20,000. His sire Meadowslea P674 is leaving exceptional depth and thickness in all his progeny with outstanding muscle and hindquarters. This a pedigree stacked with proven depth, performance and longevity and features all the great old sires used at Meadowslea in recent times, including Turihaua Crump, Meadowslea F540, Meadowslea Meat Machine, and Goldwyn 17 as well as two shots of Braveheart of Stern. T234 has calving ease, short gestation and low birthweight all ranking in the top 10% for the breed. He has moderate growth with very efficient smaller mature cow size well below his 400-day weight. He is unmatched for depth and thickness with a true sire's head. His easy fleshing and do-ability is evident with his very strong fats and his EMA ranks in the top 10% for the breed in NZ. T234 is very suitable for mating heifers or cows to breed efficient profitable females for the harder hill-country. He features as a mating sire for a number of the heifers on offer.

Comments: Meadowslea T202 was retained in the stud in 2024 after having been used as a yearling. His sire is Turihaua Jupiter who has bred exceptionally well, leaving beautifully sound cattle with outstanding feet and leg structure and very strong muscle. T202 is perfectly balanced with a wonderful clean shoulder and great top line. He is very well muscled along the loin and down through the hindquarter with deep rib and flank. His structural assessment score was near perfect 5's, he moves with ease and pulls up perfectly every time. He has a nicely balanced moderate growth curve ideal for hill-country, with the efficient moderate cow size we look for below his 400day growth figure. Combine this efficient cow weight with his strong fertility, and a short days-to-calving figure in the top 2%, and he generates a Self-Replacing Index of \$172 ranking him near very top of the breed. His carcass data is also impressive with strong muscle and fats in the top 20% for the breed in NZ.

Comments: Woodbank Dataset 22365 was purchased at the 2024 Woodbank sale. As his name suggests, he was selected for his unique data set unmatched by any animal in the NZ Angus animal search. Dataset has wonderful maternal and fertility traits with calving ease, low birth weight, milk, and scrotal size all in the top 10% for breed. His carcass data is exceptional with EMA, rib fat, and rump fat in the top 1% of the breed. His growth is in the ideal efficient range with the low mature cow weight we look for, well below his 400day, ensuring profitable beef production in hill country. Dataset is an upstanding, free moving bull, with a great outlook. A bull that will add performance to any programme and a superb heifer mating option. He was used as an AI sire, as well as naturally following-up the 80 heifers in the AI programme.

Comments: We lead off this catalogue with this cracking daughter of the high profile Taimate Roy. Her mother is a top daughter of M452 sold to Brockwood Angus in Australia to enter an embryo transfer programme. Grandmother did the full 10 years and produced some good sale bulls. U190 has beautiful balance, is upstanding, with powerful head and bone. Her paperwork shows low birthweight with exceptional growth, strong fats and a good index. Her actual IMF was very good too. A top heifer however you look at her! Mated to the very good young P700 sons. Offered in conjunction with Brockwood Angus who own a half share in her.

Comments: First Rainstorme daughter to be offered. Out of a great old cow by Glanworth 0816 who has gave us 10 calves over the years. Nicely balanced, upstanding heifer with lovely clean shoulders. As we would expect of a Rainstorme her data is top class – strong calving ease, short gestation, low birthweight but with plenty of growth and a nice moderate cow size. Scrotal, EMA and fats are all right up there giving a great index. In-calf to our 2024 keeper bull T234.

Comments: A second Rainstorme very similar to the last. This time out of a cow by Red Oak with strong NZ bloodlines sold in the 2024 female sale. Exceptional calving ease and low birthweight once again, with good early growth, milk, scrotal, and fat. Her actual EMA and IMF scans were right up there, and she again has a good index. Nicely balanced, upstanding, with clean shoulders. Mated the same way to T234.

Comments: Beautifully quiet, traditionally bred heifer here by the Rangatira 16209 who has bred so well for us. Out of a very good cow going back to our own F540, with Crump in the background too. Upstanding type with terrific hindquarter, thickness, depth, and a lot of bone. Calving ease, short gestation and low birthweight combine with good scrotal and short days to calving EBVs for an impressive maternal package. Fats are outstanding and she has another impressive index. Mated to the exciting Rainstorne yearlings that will feature in the 2025 Bull Sale.

Comments: Strong heifer here by the record price Kaharau Olympic, who was sold for \$106,000 in 2021 and was used as an AI sire. Goes back to Goldwyn 17 on the dam side giving good fertility as indicated by the large scrotal and short days to calving EBVs. Mother has bred well, she missed the sale as a ten-year-old and is still in the herd at rising 12. Nice upstanding, strong boned, maternal heifer with a very attractive type. Another in calf to our keeper bull T234.

Comments: Another very good Kaharau Olympic daughter of very similar type to the last. This time out of a cow double bred to P674 – with a pedigree like that she has to be deep and thick! She is the second calf from a young heifer, the first being a bull sold to Ben Young in 2024. Scanned with the top actual IMF of all 240 heifers scanned and has a very strong scrotal EBV. Also mated to the keeper bull T234.

62%	37%	58%	55%	58%	57%	52%	58%	

Comments: Incredibly deep, thick heifer here by the \$35,000 Rangatira Rebel. Strong early growth without an excessive mature cow weight, big fats and a terrific actual EMA despite the EBV. Dam bred a stud bull to Kaiwara Angus in 2020 – P599. Wonderful depth of flank, wide hindquarter, and strong bone – a classic Rangatira type that should be a cracking mate for Rainstorme.

Comments: Beautifully balanced heifer here, she must be one of the picks! Goes back to the \$32,00 Woodbank. Sire R578 was a top yearling who went on to be sold to Peak Hill. Granddam F704 did her 10 years, bred 4 sale bulls and had 4 daughters retained! Figures show short gestation with strong growth, big fats, and some IMF. Deep, thick, and square with a lovely barrel and real maternal type. Should be a wonderful mate for Rainstorme.

66%	41%	60%	59%	61%	61%	56%	63%	

Comments: Terrific depth and thickness to start this pen of traditionally bred cattle. A granddaughter of the \$100,000 Rangatira 1338 with Highland of Stern, Crump, and Red Oak in the background. Mother bred P593, sold to Cricklewood Angus at \$32,000, and Q394 sold to Greg Hand. Tremendous breed quality with lovely skin and real easy doing attributes. Scanned very well for IMF and has strong scrotal and fat EBVs. In calf to the top Rainstorme sons.

Comments: A Rainstorme daughter here with nice balance and style about her. Mother is a K904 daughter – they are always good cows – and she didn't disappoint breeding some top daughters and a bull sold to Neil Wilcox. Shows the great calving ease that this bloodline is known for along with low birthweight, massive scrotal, EMA, and fats. Scanned with one of the top actual EMAs and very well for IMF as well. Mated to the Tornado / Q178 yearling bloodlines.

67%	45%	61%	61%	63%	63%	58%	64%	

Comments: First of the R818 daughters that are impressive throughout the herd. Out of a Crump cow who has bred well so we know she'll have traditional deep bodied type. Big fats, short days to calving and strong scrotal all indicate fertility. Has low birthweight and short gestation too. Good coat and skin, plenty of scale and outlook. In calf to Woodbank.

59%	38%	60%	55%	57%	57%	53%	56%	

Comments: Another nicely balanced, moderate framed heifer, this time by Q347 who was sold to Glen R Angus for \$32,000. He leaves deep, thick, moderate cattle with good coats and this is no exception. Crump, Rangatira 1338 and Glanworth 0816 are other bulls in the background plus the great embryo cow G922. Days to calving and scrotal EBVs are strong and there is IMF there as well. A very exciting mate to Rainstorme.

63%	44%	61%	57%	59%	59%	55%	59%	

Comments: Very similar type of heifer again. Compact, moderate, deep and thick. Goes back to old Crump which you can certainly see in her. Dam K898 transferred to Albert Hill Angus as a 10-year cow in 2022. Grandam and great-grandam also did the full 10 years! Scanned very strongly for IMF, with massive fats. Days to calving, low birthweight, short gestation and calving ease complete an impressive spread of paperwork. In-calf to one of the R646 sons – quality heifer.

Comments: A daughter of the good old Goldwyn bull himself with Meat Machine, Crump, and F540 to fully load the pedigree. Goldwyn always left incredible fertility and easy fleshing as well as exceptional IMF. Her fats are strong with low birthweight too. A great mate for the Rainstorme yearlings.

Comments: A daughter of the \$106,000 Kaharau Olympic with the deep, thick body he leaves. Sire of dam L226 left great cows and there is Kaharau 558 in the background. Great barrel, depth of rib, and a big scrotal EBV. Actual EMA and IMF scans were very good. Mated to the P700 sons.

Comments: A granddaughter of Turihaua Rhinestone showing that great skin and easy doing ability that herd is known for. Grand-dam L072 is lot 142 in this sale while dam bred a top Q178 son sold to Josh Jamieson last year. Has calving ease and low birthweight with decent growth, strong scrotal and EMA. Deep, thick, square matronly type who will develop into a really good sound cow. In-calf to the Rainstorme sons. Top quality heifer!

Comments: A daughter of the record price Kaharau Olympic, out of a young cow by the high priced Woodbank 7017 bull who is also the mother of the first T cow up in this catalogue. Scrotal size and days to calving indicate top fertility, fats are terrific, and she had a top IMF scan to backup that EBV. Nice quality, good skin, easy doing type once again. AI follow up by the new Woodbank 22365.

Comments: First of a bigger, scaly pen of heifers. A daughter of Turihaua Jupiter, dam L271 is lot 136 in this sale. Plenty of growth, exceptional days to calving, EMA and fats give her an index right at the top end. Note some white. In calf to Woodbank who followed up AI.

Comments: A Rockley daughter with some frame to her, goes back to Turihaua Loyalty down the dam side. Massive scrotal size and short days to calving from her sire, with strong fats, IMF, and a good self-replacing index. Mated to the Tornado / Q178 yearlings.

Purchaser: _____
 PRICE: \$ _____

The Meadowslea hill-country type

Visual appraisal is still very important for selecting cattle to perform in hill - country

MASCULINE TRAITS - A strong head and jaw and thick neck indicate high levels of libido, testosterone and reproduction efficiency

NECK LENGTH - A thicker necked animal matures and reaches puberty earlier and has more libido

A longer neck indicates a higher maintenance animal that is slower to reach puberty and re-breed

HEART GIRTH - Large heart girth is an indicator of vigor and easy keeping ability

Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well on tussock

RIB FAT - Strong rib fat covers are the essential energy store for adverse conditions.

They indicate easy-doing and finishing ability and are directly related to increased fertility in both heifers and cows.

STRUCTURAL SOUNDNESS, FEET AND BONE - High country cattle cover large distances over rugged terrain so a strong skeleton is essential

HIDE - a good thick skin and coat is essential in the cold harsh environment

FLANK - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency

Higher flanked animals tend to be flighty, are higher maintenance and take longer to finish on grass

SCROTAL SIZE - Larger scrotal size at 12 months indicates daughters will reach puberty earlier, be more fertile, and re-breed early every year.

BRED FOR THE HILL COUNTRY

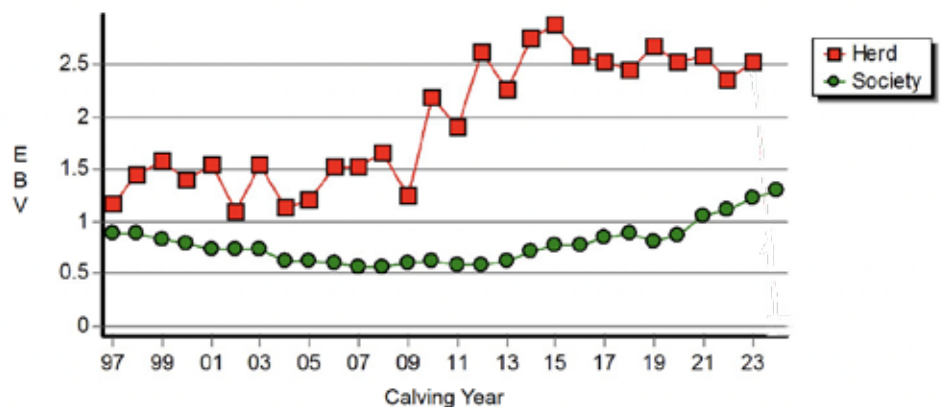

The development of the Meadowslea hill - country type has been the result of 25 years of selecting animals that perform the best in our hash hill country environment. Cows that can winter easily on the hill without supplements, stay in good order, calve easily and get back in calf early every year for 10 years has been the focus of our breeding programme. By putting pressure on cows to winter on native hill blocks it quickly became apparent that some animals could manage well in this environment and would easily get back in calf the next year, while those that struggled would be too light going to the bull, and either calve later each year, or come through dry.

Those that were dry or were not holding their condition well enough were removed from the stud herd, while the "easy-doing" types thrived and passed their genetics on to the next generation. It was clear that it was the cows with good fat covers going in to the winter that were consistently performing the best in our environment.

Ultrasound scanning is performed on all yearling bulls in early spring, and on the heifers in the autumn. For us, the most important data is the rib and rump fat cover measurement - we have found these strongly correlate with those easy doing characteristics, and we now put a lot of emphasis on this when selecting bulls to use and heifers to retain. This is reflected in Meadowslea having some of the highest fat EBVs on the Trans Tasman Angus Cattle Evaluation.

These great positive fat EBVs in the Meadowslea herd have come about simply by selecting animals that suit the hill country environment.

Carcase Rib Fat (mm)

Graph showing improvement in fat EBVs at Meadowslea while running the herd on hill country, compared with Australasian average. From TransTasman Angus Cattle Evaluation, April 2023.

■ Meadowslea herd
● Australasian herd average

The average rib fat EBV for the all the females in the sale ranks in the top 20% of breed in NZ as does their Short Days to Calving EBV.

Meadowslea Stud 2yr Heifers and their calves on high tussock.

Meadowslea Stud cows and calves come off the hill for weaning

Meadowslea Stud cows after weaning - job done for another year!

Comments: Here is a very exciting Rainstorme daughter to lead this pen of moderate framed, well-balanced heifers. Her mother was a top M452 daughter sold in the 2023 female sale to Jade Park Angus for \$3600 for an embryo programme, and U222 is offered in conjunction with them. Granddam K804 was sold in the 2024 sale as a 10-year-old. She shows all the Rainstorme attributes with great calving ease, low birthweight, growth, moderate cow size, big scrotal and EMA. She has fat and IMF – a complete package! In calf to T234 which should be a good mate.

Comments: Very strongly built daughter of N166. Out of the oldest cow on the place – C879 who gave us 14 calves over her career. Quality head and bone, big fats, and scanned very well for IMF. Proven longevity behind her! Mated to the P700 sons.

Comments: Another solid, deep-bodied Q178 daughter. Grand-dam K944 was one of our great cows and sold in the 2024 sale as a 10-year-old. We retained a full sister last year who we rate as the top heifer of her year! Good fertility, strong fats, big index, with real strength of bone and head – she is a perfect mate for Rainstorme.

65%	41%	60%	59%	61%	61%	56%	61%	

Comments: A thick nuggety type by P700 with Meat Machine further in the background. As expected, her IMF is strong, and she has very easy fleshing. Great calving ease, low birthweight, very moderate cow size, big scrotal. Actual scanning data was very impressive. A nice moderate heifer mated to the R646 sons.

66%	40%	60%	60%	62%	62%	57%	62%	

Comments: Taimate Roy again to start this pen of slightly bigger framed heifers. Mother is a Crump granddaughter who bred the lot 1 heifer in the 2024 female sale, as well as a bull to Mark Nicholson in 2021. Good figures across the board with calving ease, low birthweight, plenty of growth, fertility, and she scanned well for IMF. A great mate for T234.

Comments: By R650, a moderate compact type with good balance. Dam was a good old cow who did her 10 years and goes back to Crump. Granddam also did 10 years and bred a keeper bull L153. Thick, deep, and square type with strong scrotal, fats, and IMF – will last forever on the hill. Mated to the P700 sons.

Comments: Very impressive heifer with a powerful pedigree to start this age-group. By our own Q178, out of a cow by the \$32,000 Woodbank 7017, and also goes back to Meat Machine and Goldwyn. Plenty of length, scope, and scale about her with good head and bone. She has very strong fertility with exceptional days to calving, scanned well for IMF and fat, has low birthweight and solid growth. She is out of the same cow as the heifer at lot 44, and that cow was sold to David Dickie in the 2024 female sale. She is in-calf to Rainstorme which would be a cracking mate.

Comments: By Timperlea Quain this time, going back to Lazarus. Has Meat Machine, Braveheart and F540 on the dam side. Very strong performance figures with good fertility, calving ease, plenty of growth and fat. Her actual IMF scan was right up there and this is all reflected in a top index. Has some real balance, style and quality with an exceptionally good hindquarter. In-calf by AI to P674 who is leaving a huge amount of muscle on his progeny so that should be a great mate.

Comments: Strong pedigree here again and a very smart heifer. Sire Kaharau Olympic was a record setter selling for \$106,000 and she goes back to Turihaua Crumble on the dam side with Achiever of Kenhardt. Her dam L284 is one of the 10-year cows offered at lot 152. Lovely easy fleshing heifer, low birthweight, scanned with the top IMF of her year group with big fats and has a great hindquarter with lovely type. Also AI'd to P674.

Comments: An impressive daughter of the \$106,000 Kaharau Olympic and out of a cow by Meat Machine. Has plenty of early growth and scale about her, scanned exceptionally well for IMF, and has the powerful head and bone we would expect from that Kaharau blood. Grandmother H107 was one of our great cows – the mother of the \$92,500 Meadowslea Mountain Man. Dam K708 bred Q524, used as a yearling and sold at lot 1 to Rocky Point Station 2021. Should be a great mate for Rainstorme.

Comments: Really strong growth with plenty of scope and scale. Fat and scrotal EBVs are good too. Grand-dam L079 is lot 142 in the 10-year cow catalogue. Powerfully built heifer that should be a great mate to Quartz Q250.

Comments: A daughter of the \$32,000 Woodbank 7017, this is another strongly built heifer with plenty of scope and scale. Good growth and scrotal EBVs, strong positive fats, outstanding milk, and plenty of IMF too. Dam G931 is still going as a rising 14-year-old. Great length and plenty of potential with another exciting mate to T172.

Comments: Very nice compact style of heifer here going back to both Braveheart and Reality. She shows terrific depth and thickness. Has a lovely coat and plenty of muscle both in the pedigree and on the scan. Great calving ease, short gestation, and low birthweight with a big EMA EBV and good fat plus nice moderate mature cow weight. Could be an exciting prospect as in calf to the exceptional new Tangihau.

Comments: Here is a daughter of the great Rangatira 16209 who has bred so well for us over the years. Out of cow going back to Highlander who was sold in the sale last year as a 10-year-old. Granddam H257 did her 10 years as well. Lots of muscle here with the strength, bone, and quality we get from Rangatira. Top EMA EBV with the actual scan to back that up, with moderate birthweight and big scrotal figure. Should be a top mate for our carcass merit bull M564.

Comments: Well-bred heifer by R818, the bull sold to Australia. Out of a cow by P700. Nice, moderate, deep bodied heifer with a very strong coat. Good calving ease, short gestation, and low birthweight. Scrotal and EMA EBVs are strong and as expected of her breeding she has a lot of fat. Good traditional type of heifer, deep in the flank, wide in the hindquarter, and will make a cracking mate for Tangihau.

60%	38%	61%	60%	65%	64%	59%	59%	

Comments: Very correct type of cow to start the R4-year age group. By Turihaua Rhinestone and displays the typical Turihaua type – deep, thick, very well balanced with a great topline, head, and outlook. Short days to calving and positive fats indicate she will be fertile and handle hill country. Dam M1008 is the grandmother of our stud sire S160. S481 is our classic cross of Crump and F540 bloodlines, and she is breeding well - daughter U193 is a top heifer retained. A top mate to Rainstorme.

Comments: Nice quality Lazarus granddaughter, out of a great Crump cow who did the full 10 years in which time she bred top bulls to Waewaepa Station and Ben McLaughlan as well as stud sire L256, before being sold in our 2022 Female Sale. She goes back to some great old bloodlines. Nicely balanced cow with terrific depth of flank, great barrel, volume, and capacity about her. Her first calf was also sold to Waewaepa Station as a yearling for \$3,750. Plenty of growth, big scrotal EBV, and a great mate for Turihaua Jupiter.

Comments: A daughter of Turiroa 14830, going back to Braveheart, and out of a cow by F540. Tremendous growth here with exceptional scale and capacity. Strong EMA with a massive actual scan, and good scrotal size too. Dam also bred a heifer transferred to Denali Angus last year. A big strong cow with a great topline and tremendous spring of rib. Mated to R818 which should be her ideal mate.

Comments: Here is a very good quality cow by Rangatira 16209. Out of an F540 cow sold as a 10-year-old to Sarah Catherwood in last year's sale who bred a top Rainstorne yearling U291, used in the stud this season and a top prospect. Beautifully balanced, lovely topline, a smooth easy-doing type with real capacity and scale about her. Good calving ease and low birthweight on the page. Another great mate to R818.

Comments: A daughter of Turihaua Loyalty, out of a cow by Goldwyn 17. Mother L192 stars in the 10-year-old catalogue at lot 133. Granddam H146 bred exceptionally well too. Plenty of growth showing with real scope and scale. Strong bone and head and should be a great mate to T172, sold to Glen R Angus in 2024.

Comments: A daughter of Q141, sold to Glanworth Angus in 2021. Dam K710 was one of our top cows sold in 2024 and is the mother of stud sire Meadowslea Quartz Q250. A nice low birthweight, easy doing type with balance and style. Calving ease, short gestation, milk, scrotal, and days to calving are all strong along with positive fats, indicating she will continue to be a productive cow. Her actual EMA scan was exceptionally good and that is a sharp IMF EBV. In calf to Jupiter as well.

Comments: Another by the same sire as the last, this time out of a cow by F540. Nice low birthweight and calving ease once again with strong fertility and a good index. Dam sold to Thomas Moorhead in the 2022 sale. This time mated to R818.

Comments: Tremendous body to the first of these 10-year cows. By old Goldwyn 17 who is still a trait leader for IMF. Dam was top Crump cow who bred P555 used in the stud, top bulls to Matt McKenzie and Stu Millar, and is still going as a rising 13-year-old. Has two shots of Hingaia 469 through both Crump and Achiever of Kenhardt. Beautifully balanced, wonderful length, scope and scale about her. Fantastic fertility figures, low birthweight, plenty of growth and that big IMF figure combine for an impressive index. L192 bred a top bull T204 who was used in the stud and sold for \$10,000 last year to Scott Mackenzie. She has also had a top son sold to Annandale for \$14,000 and has a daughter in this sale at lot 119. A deep barrel, strong hindquarter, and lovely topline. A perfect mate for Rainstorme.

Comments: Terrific hindquarter on this beautifully bred daughter of Ratanui Lad, going back to the great Turihaua Crumble, and with old Glanworth 0816 on the dam side. Breeding exceptionally well – is the mother of T206 sold at lot 1 in the 2024 Spring Sale to Ratanui Angus, had another son sold to Picton Park Angus, and a daughter transferred to Kana Valley Angus in 2023. Wonderful easy fleshing and a great mate for the high IMF P700.

Comments: One of the last of the F540 cows, she is beautifully bred going back to great old matriarch A300 twice. Her mother did 10 years and was sold in the 2020 female sale at lot 108. As with all the F540 daughters her maternal traits are terrific with an exceptional milk figure, short gestation, low birthweight and strong growth. She is the mother of a top bull R644 who was used in the stud and sold to Rocky Point Station in 2022 for \$17,000. She was mated to the outstanding N166 yearlings.

Comments: Another outstanding 10-year cow. Beautiful balance, volume and capacity with a great topline. Very strong growth for a cow her age, exceptional fertility, and massive fats give her a top self-replacing index. Plenty of IMF as well. Her mother is the dam of the \$92,500 Meadowslea Mountain Man, and she is a Crump granddaughter, making her very similarly bred to that great bull. The dam H107 was sold to Sam Man in the 2022 female sale. An ideal mate for Rainstorme – she should be a very enticing prospect!

Comments: A daughter of the \$23,000 Red Oak 378, showing all the bone and strength of her strong NZ bloodlines. Her mother bred incredibly well including lot 8 in the 2022 sale, sold to Peak Hill Station at \$14,000, and was sold in the 2019 female sale as a ten-year-old. A very impressive matriarch, beautifully sound, L228 produced a cracking calf this year and is another cracking mate to Rainstorme.

Comments: Beautifully balanced cow here with a top pedigree: out of a cow by Crump and by a top breeding son of Reality. Incredibly easy doing with rib and rump fats at the very top of the breed, very strong in her IMF, and with impressive calving ease and low birthweight. This is a top breeding cow, she is the mother of S402 sold at lot 3 in our 2023 sale to Corey Roulston, with strong interest from Australia. She had other good sons sold to Strathavon and Harvey Hutton and has a cracking Rainstorme son in the mob who will feature in our 2025 Bull Sale. Put back to Rainstorme this year.

Comments: A daughter of Ratanui Lad, going back to Turihaua Crumble, and out of a cow by Kaharau 558 so traditional blood behind her. Te Whanga Trailblazer, Fossil Creek Shadow, and Waimata Zulu 689 also feature further back. Has had good sons sold to Te Anau Downs, Glenquioch, and another sale bull. Plenty of fat and strong calving ease on the page. Another cracking mate to Rainstorme!

Comments: Another very good daughter of Ratanui Lad, and dam D135 was one of the great cows of her time. Direct calving ease and short gestation coupled with impressive IMF give her some paperwork too. Had a good son sold to Cannister Farm on the Chatham Islands. Good, sound, feminine cow and mated to Rainstorme as well.

Comments: Nice moderate framed, well-bred old cow here going back to F540, and out of a cow by Matauri Reality sold as an R10 in 2023. Breeding very well – is the mother of Q294, sold to Brockwood Angus in Victoria, Australia in the 2023 sale. She also bred S178, a very sound bull used in the stud and sold to Greg Hand for \$12,000 plus one other sale bull. A terrific spread of data with top calving ease, short gestation, low birthweight, scrotal size, and days to calving all strong. Scanned with plenty of muscle, heaps of fat, excellent IMF and as you'd expect has great indexes. Is a very exciting prospect mated by AI to the \$92,500 Meadowslea Mountain Man R705.

Comments: Another of the Crump daughters, showing that coat, thickness, and breed quality he left. Great skin and coat on her, nicely balanced. Days to calving is exceptionally strong as we expect from that bloodline, and she has plenty of Fat and IMF as well. Had a good son sold to Jock Russell in 2019. In calf to one of the AI follow-up team.

Comments: Another well-bred cow, by Ratanui Lad and out of Achiever of Kenhardt so some very strong NZ bloodlines with Turihaua Crumble and Hingaia 469 in the background too. Strong carcass data with EMA, fat, and IMF all impressive and reared a top calf this year. Has 2 daughters featuring in this sale at lots 15 and 96 and produced a sale bull to Longslip Station. Moderate framed, feminine type, and in calf to the highly rated R818 yearlings.

We offer 2 packages, each totaling 5 embryos from the NZ record price Angus cow Meadowslea G1000, and sired by Kincardine Rainstorme R25. The embryos are qualified for NZ only and are stored at Xcell Breeding in Rangiora.

G1000 was sold in our 2021 Female Sale to Ballanee Angus, Australia, for a NZ record price of \$16,050. She has been flushed to Rainstorme, producing embryos for export to Australia, as well as a limited number for the NZ market. She is now 14 years old and has a naturally conceived heifer calf at foot, sired by her grandson Meadowslea Quartz Q250. G1000 is a beautiful sound cow with exceptional muscle and EMA. All her descendants have inherited this very strong muscle, so it was no real surprise when she was recently genomic tested and her EMA jumped from +7 to an incredible +13.3, ranking her in the top 1% in NZ. We think Rainstorme is the perfect mate for her, with his industry-leading calving ease, his efficient mature cow weight, and his own exceptional EMA.

Meadowslea G1000 pictured May 2021 at 10yrs old.

Meadowslea G1000 pictured Feb 2025 at 14yrs old.

THE REMARKABLE BULLS.

In 2024 we sought your prize-worthy bulls to hero them front and centre – they really fill the frame.

These beautiful bulls are worth their weight and more, requiring strong cover on sale day, and solid service every day after that.

That’s why we offer existing FMG clients (with an active policy), **14 days free cover** for bulls purchased at any FMG Premier Bull Sale up to the value of \$50,000 per bull, on completion of an Insurance Form.*

Cover can be extended beyond the initial 14 days free cover for the remaining period of 12 months at 7.6% of the purchase price (rates differ for shorter policy periods).

To find out more, talk to your FMG rep, visit fmg.co.nz/contact-us or call us on 0800 366 466.

Left to right: CHAROLAIS - Trudy and AJ McIntyre; SOUTH DEVON - Richard and Denise Van Asch; HEREFORD - Jason Hill; ANGUS - Sherson Family (Brian and Sharon Sherson, their son Rob and his wife Tracy).

We’re here for the good of the country.

*Offer subject to Livestock Policy terms and exclusions, and underwriting criteria.

FMG Premier Bull Sale Insurance Form

What is FMG Premier Bull Insurance?

On receiving a completed FMG Premier Bull Sale Insurance form, FMG provides its existing FMG clients with an active policy 14 days free insurance for bulls purchased up to \$50,000. For bulls purchased over \$50,000, please contact an FMG representative.

What is the length of cover?

Your specified bull(s) will be insured for 14 days once you have fully completed this form and it's received by an FMG representative. If you would like a longer period of cover, simply tick the Cover extension box below to extend your Premier Bull Insurance to 12 months. The specified bull(s) is then insured for the next 12 months at **7.6%** of the purchase price.

FMG will invoice you for this additional cover.

What are the benefits?

<input checked="" type="checkbox"/> Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, injury, or illness.
<input checked="" type="checkbox"/> Theft or death	Cover for your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
<input checked="" type="checkbox"/> Vet costs	Cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Kincardine Rainstorme R25

Purchased May 2022 \$81000. Trait leader for Calving Ease and Scrotal size. 260 progeny in 22 herds in NZ and Australia. Exceptional data set for efficient, profitable beef production in NZ hill-country. He has a truly outstanding line of R2yr bulls coming forward for sale in June 2025. The first of his in-calf R2yr daughters are a feature of the sale. He is also a mating Sire of selected feature females on offer.

Turihaua Crump E5

(born 2009) Recognised as one of NZ's most influential and long-lasting sires with over 450 progeny in 21 herds in both NZ and Australia. His daughters have exceptional fertility ranking him as a trait leader for short days to calving.

Sons and Grandsons selling up to \$92000 for studs across NZ.

He has a major influence on this sale, with 10 yr old daughters on offer, as well as appearing in the pedigree of most of the offering in the catalogue. His bloodline ensures our females have structural soundness, fertility and longevity, making them highly suitable for the hill-country environment.

Meadowslea F540

(born 2010). Our most influential home-bred sire with over 300 progeny in 11 herds in NZ and Australia. He has very strong maternal and fertility traits, with industry leading short gestation, low birth weight, milk, short days to calving, Rib and Rump fats and IMF. His longevity ensured he lasted active in the herd till 13 years of age.

He has a major influence on the sale, with 10 yr old daughters on offer, as well as having numerous outstanding descendants throughout the offering.

The Crump X F540 bloodlines are legendary and have been instrumental in forming the consistency of type the Meadowslea herd is known for.
