

MEADOWSLEA ANGUS 10TH ANNUAL FEMALE AND EMBRYO SALE

**ON-LINE AND ON-FARM
APRIL 29TH 2026 – 1PM**

www.meadowslea.co.nz

**MEADOWSLEA
ANGUS & SHEEP GENETICS**

OFFERING:

72 R2yr Stud Angus Heifers

24 R3yr Stud Angus Heifers

24 R4yr Stud Angus Cows

28 10yr old Capital Stock Angus Cows

10 Embryos

FERTILITY AND MATERNAL TRAITS the key to profitability in any herd!

Meadowslea stud cows winter on unimproved native tussock blocks without supplements being fed. This challenging environment tests the ability of the pregnant cow to maintain condition through periods of winter feed shortages. It is the energy stored in her rib fat levels that enable her to survive, thrive, and ultimately get back in calf and rebreed each year.

Days to calving is a crucial fertility trait that measures the number of days from when the bull is let into the mob until the cow calves. This identifies cow families that calve early every year. Those earlier calves will always be heavier at weaning, and selecting for short Days to Calving will reduce later born calves and allow higher conception rates in a shorter mating period.

"At Meadowslea we have always had some of the highest rib fat levels in the Angus breed. The importance of these fat levels is now recognised with our cattle now having some of the shortest days to calving EBVs in Australasia."

David Giddings

GOOD FAT COVER AND EASY-DOING ABILITY

Meadowslea stud 18mth in-calf heifers showing good fat coverings and ready to winter on the hill.

Meadowslea cows and calves come down off the hill for weaning.

A cow's condition and her ability to lay down fat in times of surplus, and to draw on that fat as an energy source in times of feed deficit is vitally important. This rib and rump fat is the cheapest and most efficient energy store on the farm, and will determine the ability of the herd to get back in-calf and rebreed early after a hard winter or difficult spring.

All Meadowslea yearling heifers are mated and any dries culled. After calving these heifers are run in mating mobs together with mixed age cows and expected to get back in calf early, rear a good calf off the tussock, and stay in good order. This is a tough ask for a first-calver, but this year that age-group scanned with a terrific 97% back in-calf rate!

A cow going into winter with good fat coverings carries an energy store on her back equivalent to approximately 2 bales of baleage.

The Meadowslea herd has natural rib and rump fat levels amongst the highest in the breed in Australasia – acknowledged as a key trait for fertility in the harsh environment.

Meadowslea Tenth Annual Female Production Sale

ON-LINE AND ON-FARM

State Highway 8, 23 Trotters Road, Fairlie
5km west of Fairlie

ON-LINE BIDDING OPENS

with video release on
Sunday 26th April - 7pm

HELMSMAN STYLE AUCTION

Wednesday 29th April - 1.00pm

Sale Format

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online. The sale will be hosted on our own **yourbid** platform and accessed through our website www.meadowslea.co.nz. Prior to the sale, all lots will be filmed and available for viewing up until sale day on the Meadowslea website.

The cattle are available for viewing in the paddock anytime

– just call 0272299760 to arrange a time.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Meadowslea website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid. Buyers registering online will receive a buyer number in their email which will automatically accompany each bid they place, whether they do so at home on their computer, or through their smart phone while in attendance. Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the auctioneers. All live bids and all lots will be visible at all times, both online and on a big screen on-farm.

Online registration is available NOW and we encourage everyone to visit our website www.meadowslea.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

The Online Open Day video will be released on our website and on Facebook on Sunday 26th April at 7pm. This video will include footage of every heifer in the catalogue with expert comments from genetic specialists and will be available for viewing right up until the sale.

Online bidding will be open from 7pm on Sunday 26th April until the conclusion of the sale.

On Sale Day, April 29th, the on-farm registration and bidding will open at 11am.

Livestreaming with interactive viewing will commence at 12.30pm with a walk through of all the pens with commentary from the vendors and genetic specialists. Requests to review particular cattle can be made through the comments section of the web-site chat room or by telephone or text to the vendors or stock agents in attendance. This will continue throughout until the conclusion of the sale.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours:

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours

Example:

\$2500 Displayed in Red denotes the Vendor's reserve and indicates there has been no bid

\$3000 Displayed in Blue means an active bid has been received

\$3500 Orange highlight indicates a new Bid has been received within the last 2 minutes on this lot

\$3500 The holder of the leading bid will have the lot number highlighted in green on their computer or their smart phone

The sale will run until 2pm on April 29th. After this time the sale will conclude once there has been a period of at least 2 minutes without a bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes. This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.

Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.

All updates will be posted on our website, as will an up-to-date version of this document.

Rebate purchasing Commission. Hazlett livestock will be in attendance and be booking the sale

1. A 6% rebate commission will be paid to all nominated stock firms on females sold for stud transfer, provided the vendor is advised of the purchaser's intention to buy before the commencement of the on-farm sale, or before the purchaser commences bidding online.
2. A 3% rebate commission will be paid to the nominated buying company for all non-stud transfer females, and for stud transfer females when the vendor has NOT been advised of the purchaser's intention to buy.

Disclaimer: The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither AngusNZ nor ABRI oversee or audit the collection of this data.

CONTACTS AND ANGUS EBV AVERAGES

All Cattle have been vaccinated for BVD and all young cattle have been tested clear.

FOREWORD

Meadowslea Angus Stud was established in 1985 with the purchase of 6 capital stock heifers from Australasia's oldest Angus stud, Turihaua, north of Gisborne. We have steadily expanded ever since to meet strong demand for bulls from the hill-country market we target – our belief is that an animal must first and foremost be suitable for the environment it is run in.

With the additional lease of a neighbour's property 11 years ago and the recent purchase of Punaroa Downs next door we have been able to continue increasing stud cow numbers and this season have mated 730 stud females.

The demand for our bulls has steadily increased with 170 bulls sold at auction in 2025. Ten years ago, with a confident beef industry and the lease block fully stocked, we held our very successful first annual female auction. We now plan to stabilize at around 500 cows and sell a similar number, and age-group breakdown, every year going forward. The longevity, fertility, constitution, and structural soundness of our female cattle are crucial for us to present the number of females in this catalogue. We have very few dry cows and minimal losses to breakdowns or poor constitution because our cows are the right type to handle their environment.

This means fewer replacements are required and more quality surplus females are available to sell.

At Meadowslea all yearling heifers are mated. The decision around which to sell and keep was made in mid-March following carcass scanning and pregnancy testing. A good cross-section of all our leading bloodlines has been included and no doubt many of these young females we are offering will turn out to perform as well as, or better than some we are keeping ourselves! Clients purchasing these females in the past 9 years have been very satisfied with their performance and each year we have had many repeat buyers. We offer these females for sale with complete confidence, and in particular the annual draft cows are true capital stock having done up to 10 years on the hill, survived droughts and snowstorms, without ever being fed supplements. These "M" cows include the 5th age-group of daughters born to our most influential sires Meadowslea F540 and Turihaua Crump, and carry industry leading maternal and fertility traits with tremendous longevity.

As you read this catalogue it will become clear that the animals that perform the best in our environment are of a similar type – strong rib fat levels drive our programme forward for two reasons. It is strongly linked to fertility, early puberty and the ability to calve early and re-breed early over a lifetime. Secondly, it is the energy store the females use to get through the feed shortages and extended stress periods all too common in this harsh environment. **It is significant that the average rib fat EBV of all females on offer is +2.5 ranking them in the top 25% for the breed. The average for the all-important fertility trait of short Days-to-calving at -4.9 days also ranks the sale females in the top 30% for the breed.** High-growth females do not work well in our hill-country environment and you will see few in the catalogue, as over time they have failed to perform and so have dropped out of the herd.

When selecting cattle for our own breeding programme, the key figure we look at is the Self Replacing Index, which we find works well at identifying cattle that can perform and produce on hill country. We strongly suggest clients buying females – and bulls as well for that matter – do the same, in order to sustain a productive and profitable cow herd. The next most important figures are the Days to Calving – the key measure of cow fertility – and Rib Fat, which identifies the easy doing animals that can thrive in the hill country environment.

After a couple of bumper growth seasons in South Canterbury, the very dry conditions of early 2024 served as a sharp reminder of the type of animal that thrives in this environment, and that which doesn't. It is very gratifying to see how well these moderate framed cattle with big rib fats held their condition through the winter of 2024 and produced cracking calves despite tightly limited feed supplies.

All cattle offered have been scanned in-calf by Aorangi Vets Ltd. All dry cows have always been culled at Meadowslea. We individually mate all stud cows, with one bull per mob initially and change bulls over after approximately 30 days. Each cow or heifer is individually assessed and her mating sire carefully selected to optimise her conformation as well as her EBVs, so as to enhance her progeny's suitability for the hill-country environment.

In 2025 we had 227 heifer calves born. We mated 220 in 6 different mobs selected on pedigree, performance, and type. Some mobs were single mated while others had 2 yearlings in the second cycle. **The result was a 97% conception rate**

FOREWORD

for the heifers while the 500 mixed age cows achieved 96%. This is a tremendous endorsement of the emphasis we place on the key fertility and maternal traits that are the main drivers for profitability in any beef herd.

We undertake DNA parentage testing for all stud calves and purchasers will need to do the same if they intend to register or generate EBVs on the progeny.

This is the tenth year we have offered our stud females to the industry, and many of the sires used are unique in the world to the Meadowslea herd. For stud breeders this is an opportunity to access out-cross bloodlines proven to be highly productive in the hill country, and for commercial clients the option to gain access to genetics that would not normally be available in their herds for 3 more years. From our perspective, the more of these bloodlines that are available in the industry here in NZ, the better the chances are of us being able to source sires that fit our breeding programme; a task that is becoming increasingly difficult with the NZ Angus gene-pool now so heavily influenced by genetics sourced from the USA and Australia. Feedlots drive most of the selection criteria for these imported genetics making them, in our experience, unsuitable for our NZ grass-fed sustainable hill-country production.

With a world-wide shortage of beef breeding females, and record pricing globally, it is a very exciting time to be increasing cow numbers. We wish you well with your purchases and stand behind these cattle 100%.

Regards,

David Giddings

An administration fee of \$100 per female will be added to all animals purchased for stud transfer. (This is to cover administration and any further gene testing requirements).

Please note: this is in addition to any transfer fees charged by the NZ Angus Assn.

EBV tables in this catalogue represent the top 25% and 50% for each trait except where Mature cow weight is shaded it indicates desirable for under 600 Day weight and exceptional for under 400 Day weight.

Comments: Yet another very similar Rainstorme heifer with the same classic front end, style, and neck extension. A nicely balanced, clean shouldered, easy doing type. Out of an N166 daughter which is a very good cross with Rainstorme - N166 of course was the sire of Mountain Man. Grand-dam is lot 139 in the 10-year-old catalogue and has bred very well with three sons making the winter sale team, including U522 who was used in the stud. More impressive maternal data with big EMA and massive fats! Mated by AI to U322, a top bull sold in our 2025 sale to Woodstock Station.

MEADOWSLEA MARK 100 YEARS OF STUD BREEDING

2025 marked a significant milestone for the Giddings family of Fairlie as they celebrated a century of breeding Romney sheep on the same Meadowslea property.

It was 1925 when Gilbert Giddings then still a teenager took the train to Gore and purchased 40 stud Romney ewes. He wasn't old enough to have them registered in his own name and so the first Meadowslea Romneys were registered in his mother's name – Mrs Sarah Giddings.

The stud today is run by Gilbert's son David and his son George. George has a 2-year-old son named Gilbert all living on the Meadowslea property.

The Meadowslea Stud sheep flock currently consists of around 3000 recorded ewes run over 4 properties. As well as the base Meadowslea Romney flock, the operation now includes worm resistant Kiki South Romneys, Romdales, Texel x Romney, Perendale x Texel x Romney, Kelso x K Romney, as well as a black face Terminator breed. All the breeds are run entirely unshepherded with high survival, and low input easy care, the cornerstone of the breeding programme.

MEADOWSLEA ANGUS HISTORY

In 1986 David Giddings met Hamish Williams from Turihaua Angus at a Romney stud dispersal sale in Otago. Hamish was establishing a Romney stud at the time, and the conversation that followed led to a reciprocal agreement to exchange capital stock young females over a 3 year period. In 1987 Hamish travelled to Meadowslea and picked 20 in lamb stud Romney 2th ewes, and David visited Turihaua and selected 6 in calf capital stock 2yr heifers. These foundation females were wonderful traditional NZ bloodlines, at a time when the bigger framed USA genetics were becoming increasingly popular with Angus breeders in NZ.

David says at the time he had no idea these were some of the only capital stock females to ever be sold from Turihaua and the Giddings family are eternally grateful to the Williams family for the incredible opportunity. From those original 18 heifers, Meadowslea Angus has grown to be mating 720 stud females annually, as well as holding NZ's biggest annual female production sale. This has all been possible due to the incredible fertility and structural soundness of the Turihaua herd, which was an industry leader in mating 2yr heifers back in 1987.

David says while there have been massive changes in breeding and performance over all those years, some things haven't changed at all, with the fundamentals of structural soundness, strong constitution, and fertility, as relevant today as they were back in 1925.

NEW SALE SYSTEM CELEBRATES ITS 6TH BIRTHDAY

Yourbid, the online Helmsman auction system developed by Meadowslea Genetics of Fairlie, celebrates its sixth birthday with the stud's upcoming In-Calf Angus Female Sale on April 29th.

The stud holds 7 on-farm sales a year across their sheep and Angus cattle breeding operations, including the annual in-calf sale in early May. In 2020, this date fell within NZ's Level 3 Covid lockdown, during which no crowds or gatherings were permitted, making an outcry auction impossible.

With feed supplies tight and meat processing capacity limited, deferring the sale really wasn't an option either, meaning the only way forward was to hold it online. After looking at the various options available, the Meadowslea team decided to design their own from the ground up.

After running helmsman sales for many years for ram sales and in-lamb ewe sales previously, David and son George Giddings could see how an online helmsman sale would work very well for stud stock. They were able to provide a webdesigning friend with a specific brief, and a week or so later Yourbid came into being. The sale was very strong, with spirited bidding from around New Zealand, despite no buyers being in attendance at all.

Since that first sale in 2020, Meadowslea have run 30 successful sales for their own stock, as well as a number of sales for other stud breeders in NZ and Scotland. The system has proven very popular with stud-stock buyers, giving them the extra time to consider their purchases carefully, and the option of buying in choice order rather than lot number order.

As well as that first female sale, Meadowslea has run 2 bull sales, an online semen sale, and 3 ram sales on Yourbid. Yourbid has been used very successfully for studstock sales in Scotland, and the Giddings family have received enquiry from breeders keen to use it from around New Zealand as well as in Australia, France, the US and as far afield as Romania. 3 other ram breeding operations have used it in New Zealand this summer, with a number of bull sales confirmed for the upcoming season and many more interested in switching to it over the next few years.

Online helmsman-style auction

Yourbid works as a Helmsman-style auction - meaning all lots are offered for sale simultaneously.

Other online livestock sales platforms in New Zealand use the traditional sequential auction model, whereby each lot is sold one at a time, one after the other. Yourbid uses the "Helmsman" style of auction. This means that all the lots on the sale are open for bidding at the same time, which is helpful for both buyers and sellers, particularly when conducted online. Bidding is also kept open over a period of several days, rather than the minute or so per lot of a conventional auction.

A key difference of this platform compared to any other the developers have seen is the bidding screen which shows the current prices of all lots simultaneously. Reserve prices are shown in red for a start, this changes to blue once the first bid is received, and the buyer number of the current leading bidder is displayed. New bids are highlighted in orange for a minute. Buyers who are logged in on their own device see the lots they hold highlighted in green. This gives an instant overview of the auction so anyone can see on which lots the activity and interest is, making it easy to establish their relative market values.

All online models have some level of time delay between when events happen on-site and when they are seen by remote buyers. For a traditional sequential auction a delay of 15-20 seconds can be very significant, when each animal might only be in the ring for 90 seconds or so. By keeping the entire auction open for a longer period of time this problem is mitigated significantly. It also means sales will not be affected significantly by any temporary technological glitches.

Giving buyers time

Selecting seedstock is a major decision for sheep and beef farmers, and one which will have ramifications on their operations for years to come. People need time to gather and process information to make decisions. This is even more important when buying remotely, when information gathering is more difficult and takes time – meaning remote buyers are significantly disadvantaged at an online sequential auction. The Yourbid system gives buyers this extra time, and

by integrating the bidding on the website alongside the online catalogue, videos of each lot and a live commentary, this information is readily available to buyers. Rather than turning up on a given day and viewing all the animals in that tight time-frame, buyers can go through the catalogue, view the videos, make selections, and bid at their leisure from home over the period of several days the sale is open.

Bidding order of preference

Another advantage of a Helmsman-style auction is that it allows buyers to bid on stock in the order of their preference, rather than the catalogue order. For instance, as a buyer you might be interested in lot 8 and lot 12. At a traditional auction, lot 8 comes into the ring and isn't selling for too much, however lot 12 is your first preference so you decide to wait for that animal to come into the ring. Lot 12 comes in, sells for too much money, and you can't go back and bid on lot 8 because that animal is sold. Under the Helmsman system buyers can chop and change throughout the bidding. Meadowslea have analysed the bidding data for the sales they have run already, and it is obvious that a lot of buyers will bid on a certain lot to a particular level, then change to another lot, then perhaps go back to the first, or move onto a third animal they like. Some buyers bid on as many as 8 different animals to get the one they wanted – in a conventional auction they would have missed out completely or ended up with one that wasn't in their top-10 at all. By running the auction over a longer period, those who missed out on their first choice were able to go back through the videos and catalogue (or back through the pens for those who were actually onsite) and pick another animal they were satisfied with.

Integrating on-farm and online bidding

Integration of on-farm and on-line bids is crucial to the success of a platform like this. This system works by having large TVs on-farm displaying the bidding screen. Buyers on-site can bid through their smart phones, and those bids are displayed in real time. Some buyers will still prefer to attend on-farm and bid using pieces of paper as per a traditional Helmsman sale – they write their buyer number, their lot number, and the bid price on a piece of paper and hand it in – they are able to enter this directly into the online system so it shows up on-screen in real-time as well.

Engaging with potential buyers

By providing a live-chat on the platform, potential buyers are able to ask questions, request another closer view or more information about a particular lot, and even send through jokes and one-liners. Online videos and the livestreamed commentary are produced through Facebook Live. All this makes for a much more engaging and entertaining environment for the buyers, compared to what many feel are the sterile and austere atmospheres of some of the other established online platforms.

Yourbid invite enquiry from breeders, agents and commercial farmers interested in using the platform, and envisage it becoming an independent platform able to be used by all industry players.

All enquiries to george@yourbid.org or call **David 027 2299760**

ANGUSNZ EBV'S AND SELECTION INDEXES

EBVs and Selection Indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) to provide the best measure of an animal's genetic merit.

To ensure the accuracy of EBV and Index data, AngusNZ combine with Angus Australia to create a reference population known as the TransTasman Angus Cattle Evaluation (TACE).

By using TACE – along with visual and structural appraisal – will assist in creating a balanced phenotypical and genotypical breeding outcome.

SELECTING YOUR NEXT ANGUSNZ SIRE

1. Consider your individual EBVs of importance
2. Consider other traits of importance (e.g. visual assessment)
3. Identify the AngusNZ selection index of most relevance to your breeding programme
4. Rank animals using the chosen Selection Index.

The majority of these steps can be undertaken online at www.angusnz.com, allowing you to generate a shortlist of bulls ahead of sale day. Alternatively Beef & Lamb Genetics have developed a new tool to make it easier to find the best bulls for your farming operation. Using a series of buttons and sliders, you refine your breeding objectives, then click a button and nProve generates a list of bulls that best fit. It's free to use, there's no need to register and there's also helpful tips to get started.

Try it out at
www.nprove.nz

AngusNZ Individual EBV's – Please note: Only EBVs from the same TACE analysis can be directly compared.

GROWTH

200, 400 & 600 Day Weight EBVs (kg) – Larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

Mature Cow Weight (kg) – Larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self-replacing or maternal production systems.

Milk (kg) – Higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

FERTILITY & BIRTH

Calving Ease Direct (%) – Higher (or more positive) CEDir EBVs indicate 2 year old heifers will have less difficulty calving this sire's progeny.

Calving Ease Daughters (%) – Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at 2 years.

Gestation Length (days) – Lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

Birth Weight (kg) – Lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

Days to Calving (days) – Lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval date to calving.

Scrotal Size (cm) – Larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

CARCASE

Carcase Weight (kg) – Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcass weights.

Eye Muscle Area (sq. cm) – Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm) – Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcass weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (%) – Bulls with higher (or more positive) RBV EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat (%) – Higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

OTHER EBVS

Docility (%) – Higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

AngusNZ Selection Indexes

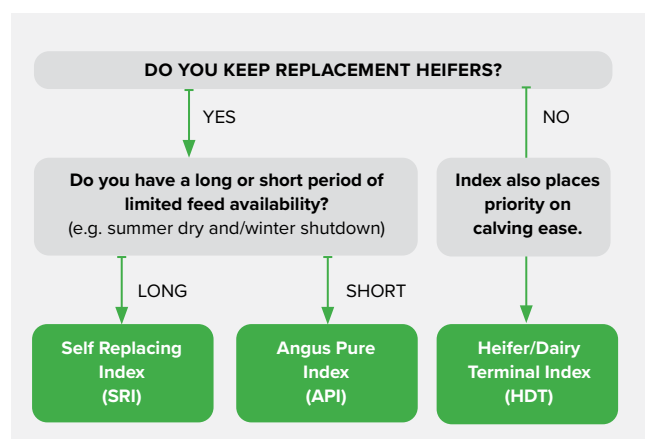

AngusNZ currently has three different selection indexes. These are:

1. Self Replacing Index
2. AngusPure Index; and
3. Heifer/Dairy Terminal Index

Each selection index is reported in units of net profitability/cow mated (\$), and relates to a commercial herd using Angus bulls. Each index is focused on efficient beef production, including maternal traits where appropriate.

Comments: Recognised as one of NZ's most influential and long-lasting senior sires of recent times. He has over 450 progeny in 21 herds in both NZ and Australia and is a trait leader for the important fertility EBV of short days to caving at -9.1 days. Traditional NZ Angus hill country type with proven industry leading fertility. His grandson Meadowslea Mountain Man was the highest selling 2-year-old bull in NZ in 2020 and sons and grandsons have sold for up to \$92,000 at studs across the country. His daughters and granddaughters are the top breeding females in our herd and are proving exceptionally fertile and productive in our hill country, resulting in him now achieving a self-replacing index in the top 20% for the breed. He has a major influence in this sale including the last of his 10-year-old daughters on offer, and his bloodlines and structural soundness are behind almost all the females catalogued.

Comments: F540 continues to have a huge influence on our herd with exceptional longevity to 13 years old. He has been used successfully in many breeding programmes with over 300 progeny in 13 herds in NZ and Australia. Deep, thick, easy-doing sire with exceptional production figures for hill country. He has strong maternal and fertility traits and has been a trait leader for both short gestation and milk, while his short days-to-calving, rib and rump fats, and IMF all feature in the top 15% for the breed. His daughters are outstanding in the herd weaning thumping calves while maintaining their condition all year round, a real testament to his easy doing traits. He features strongly in this catalogue including the last of his 10yr daughters on offer, and numerous daughters and granddaughters throughout the sale.

Comments: We retained this sire in 2019 and rate him as possibly the best Turihaua Crump son ever! He is out of a top-performing Glanworth 16 cow who was sold in our 2021 Female Sale to Australia for \$9,300. She also bred our top price bull in 2018 - M429, sold to Red Oak Stud for \$18,000. The first of the N166 sons were the standout feature of our 2022 bull sale including Meadowslea Mountain Man R705, sold to KJ Angus for \$92,500 and achieving the top price in NZ for a 2-year bull in 2022. His progeny display exceptional quality with terrific power and strength. He has some exciting daughters on offer and also features as a mating sire throughout the catalogue.

Comments: Quartz Q250 was retained in 2021. He is a son of our high-performing carcass merit sire M564 and a grandson of our record price cow G1000 who was sold in our 2021 Female Sale to Australia. His mother is a 10-year-old Crump granddaughter who was sold in our 2024 female sale. Q250 is a lovely, well-balanced, moderate-framed bull who ticks a lot of boxes for hill country production. He has calving ease with exceptional low birthweight and the moderate efficient mature cow size we look for in hill-country. His maternal and fertility traits are very strong with his scrotal size, short days to calving, milk and fats all ranking in the top 10% for the breed. He has inherited the good EMA coming through from his record-priced grandmother G1000 who's EMA is now in the top 1% in NZ at +13.1sq cm. Quartz also has IMF in the top 20% for the breed. A very sound bull with a great pedigree behind him. He has some top daughters and granddaughters on offer

Comments: Purchased at the 2021 Turihaua bull sale, Tornado is a lovely moderate framed, wonderfully sound, traditional Turihaua type of bull. He has exceptional structural soundness, and wonderful feet and legs to give longevity of production. He exhibits strong muscle with a deep flank and very good hindquarter. We see a lot of similarity to Turihaua Crump in this bull and the first of his 2yr sons were very impressive in our 2024 bull sale . He has impressive daughters in our herd and on offer in this catalogue. He has been mated to some good cows throughout the sale. We have used a number of his very exciting sons as mating sires in this catalogue and expect them to be at the very top of our 2026 bull sale line-up

Comments: Also purchased at the 2021 Turihaua Bull sale, Jupiter impressed us with his superb structural soundness, scoring almost perfect 5's in the Beefclass scoring system. He is a deep bodied, moderate framed bull with exceptional muscle, and this is supported with a strong EMA figure in the top 10% for the breed. He has the important fertility trait of short days to calving ranking in the top 4% for the breed and the easy doing fats we rate so highly in the hill-country. All this combined with a very moderate mature cow weight generates a SRI index in the top 3% for the breed. The first of his R2-year progeny in 2024 were outstanding with 5 sons used as yearlings and one retained for stud duties. His young daughters are some of the most productive in the whole herd and beautifully sound. He has some impressive daughters on offer and is also a mating sire to a selection of cows in the catalogue.

Comments: R818 was the outstanding Meat Machine son from the 2020 calf drop and was sold in our 2022 bull sale to Jade Park Angus in Australia for \$23,500. The bull has remained at Meadowslea and we are very fortunate to be able to use him. He has developed tremendously, and his depth and thickness have impressed all who have seen him. R818 has strong caving ease and low birthweight coming from the Meat Machine bloodline. He displays a very deep, wide hindquarter and a wonderful clean shoulder with great balance and outlook. R818 has the exceptional easy doing ability we value so strongly in the hill-country, with good rib and rump fats and the volume and capacity to handle the hardest conditions. The first of his 2yr sons from his yearling mating were very impressive in the 2024 bull sale, including T106 sold to Turihaua Angus His first sons in Australia recently sold well at the Jade Park bull sale. He has daughters on offer as well as being used as a mating sire throughout the catalogue

Comments: R646 was retained in 2022 after being used as a yearling. His sire Meadowslea M429 was sold to Red Oak stud for \$18,000 and was a son of the \$100,000 bull Rangatira 13-38. The dam of M429 is the great old cow G922 who is also the dam of Meadowslea N166 and was sold to Ballanee Angus, Australia for \$9,300. The dam of R646 is a great cow by KayJay Freedom I36 going back to Braveheart. R646 has tremendous volume and thickness with very strong growth and good fertility traits combining to give him an SRI index in the top 20% for the breed.. He has an exceptional muscle pattern with superb width across the loin and hind-quarter. His wonderful easy doing ability is clear to see with rib and rump fats in the top 20% for the breed. He has bred outstanding progeny to date, with terrific structural soundness. He has daughters on offer as well as being used as a mating sire.

Comments: Sudeley Bjorn was purchased at the 2023 Sudeley sale for \$20000. We were keen to secure a son of Sudeley Viking who's maternal pedigree goes back to one of our greatest ever cows, Meadowslea A330 who shows up behind so many of our top animals including Meadowslea Mountain Man. Her progeny have always scanned with terrific IMF including retained sires Meadowslea F737 and Meadowslea P700 who both rank on the top1% for IMF. Sudeley Bjorn also has exceptional IMF ranking in the top 4% for the breed. He has very good calving ease with low birth weight and strong scrotal size making him a great heifer mating option. His first crop of R2yr daughters are a very consistent line and his 10 daughters on offer are all very even with an average IMF figure of +2.2 ranking them in the top 20% for the breed

Comments: Tangihau T613 was purchased at the record-breaking 2024 Tangihau Bull sale. For us he was the standout bull there, with exceptional muscle and soundness in a moderate frame. Weighing in as one of the heaviest bulls on sale day at 850kg, he now ranks in the top 15% for both 200day and carcass weight. Sired by the high performing Shian 18-563, who bred all the high priced Tangihau Stud bulls in 2023, his pedigree features the very successful cross of the Reality and Braveheart bloodlines. T613 displays the exceptional 200-day growth, and with the very efficient mature cow weight below his 400-day. Very strong muscle is matched with an exceptional hindquarter and immaculate feet and leg structure. T613 is a very complete bull with wonderful style, presence, and superb temperament. The first of his calves have just weaned at terrific weights. He features as a mating sire throughout the catalogue.

Comments: Atahua 59-22 was purchased at the final Atahua bull sale in June 2024. He was selected for his exceptional depth and thickness together with outstanding eye muscle area which ranks in the top 4% for the breed. He was sired by the \$60,000 Kaharau 589, who was a top Braveheart son of his year, and carries some of the best known Kaharau blood lines with Waihohonu 113 and Kaharau Class 790 featuring in the pedigree. His dam is a proven 11-year-old cow who produced 9 calves in 9 years. 59-22 is a moderate framed, deep bodied bull with strong calving ease, short gestation, and low birthweight. He has the very efficient moderate cow weight we look for, that is well below his 400-day. His scrotal size ranks in the top 5% for breed, as does his exceptional eye muscle area at +9.4sq cm. He has the easy doing ability we look for in the hill-country with good fats and strong fertility. This is a very well-balanced, stylish bull with true Angus quality head and bone, and a wonderful skin and coat. He has a wonderful data set for mating heifers to produce easy-doing efficient females for profitable hill-country beef production. He was used to follow up the AI on the R3yr heifers.

Comments: Meadowslea T202 was retained in the stud in 2024 after having been used as a yearling. His sire is Turihaua Jupiter who has bred exceptionally well, leaving beautifully sound cattle with outstanding feet and leg structure and very strong muscle. T202 is perfectly balanced with a wonderful clean shoulder and great top line. He is very well muscled along the loin and down through the hindquarter with deep rib and flank. His structural assessment score was near perfect 5's, he moves with ease and pulls up perfectly every time. He has a nicely balanced moderate growth curve ideal for hill-country, with the efficient moderate cow size we look for below his 400day growth figure. Combine this efficient cow weight with his strong fertility, and a short days-to-calving figure in the top 5%, and he generates a Self-Replacing Index of \$166 ranking him near very top of the breed. His carcass data is also impressive with strong muscle and fats in the top 25% for the breed in NZ. He is a mating sire with adult cows.

Comments: Snowstorm was retained in the stud in 2025 after being used as a yearling. He was the standout son of Rainstorm's first year progeny and out of a great Crump cow. The Rainstorme X Crump pedigree was exactly what we had in mind when purchasing Rainstorme for \$81000, and it has proven to be an outstanding cross. Snowstorm has an exceptional spread of data for efficient hill-country production with terrific calving ease, low birthweight, scrotal size and milk figures. His important rib and rump figures are top 1% and his carcass data features EMA at +8.1sq cm, with IMF in the top 25% for the breed. Snowstorm is a very exciting prospect and has been widely used in AI programmes in both NZ and AUS. He features as a mating sire with some of the top females on offer.

Comments: Meadowslea U181 was retained in the stud in 2025 after being used as a yearling. He is sired by Meadowslea R818 who was sold in our 2022 bull sale to Jade Park Angus in Australia. U181 has a great NZ pedigree featuring 2 shots of Meadowslea F540, and going back to the legendary Turihaua Crump. His maternal grandam is the great old cow H107 who is also the mother of Meadowslea Mountain Man - sold to Kay Jay Angus for \$92500. U181 displays terrific depth and thickness with a great coat for the hill-country. He has wonderful foot and bone with terrific width over the top. His figures feature moderate birthweight followed by strong growth. His carcass data is impressive with plenty of muscle, very strong fats and IMF in the top 20% for the breed. He was used to follow up AI in the R3 heifers.

Comments: Kaharau Utopia U361 was purchased at lot 2 in the 2025 Kaharau Bull Sale. He is a beautifully sound compact easy fleshing bull with an outstanding hindquarter - as good as you will ever see! He displays the classic wedge shape with a wonderful clean shoulder, great neck extension and balance, allowing him to pull-up perfectly every time with the style and Presence of a true sire. A look back deep into his bloodlines reveals some of the greatest ever breeding sires of the NZ Angus breed you will ever see lined up in one single pedigree! Hingaia 469, Turihaua Crumble, Turihaua Tiger, Turihaua Jake, Waimata Zulu 689, and Zodiac 1st of Kaharau, all feature ensuring exceptional structural soundness and longevity. More recent sires include the great Matauri sires of Reality and Resolution ensuring strong maternal strength and fertility traits. Utopia was a standout at the Kaharau bull sale and has continued to impress all who have inspected him recently. He has been accepted for entry into the 2025 Angus Sire Benchmarking programme and we look forward to measuring how his progeny perform so we can get better links genomically to the great NZ sires in his pedigree. He is mated to top females throughout the catalogue.

Comments: Kenhardt U123 was purchased at the Kenhardt bull sale in 2025. His strong NZ pedigree combines some of the all time greats of the NZ Angus world. He is sired by the \$90000 Cricklewood Pandemic who's pedigree includes Waimata Zulu 689 and Zodiac 1st of Kaharau. On the maternal side he is out of a great breeding cow going back to Hingaia 469 and Turihaua Jake. U123 has developed tremendously since we purchased him and he has some of the best fleshing and strongest hinqarter in the breed. There has been interest from the US in this bull and we think he has a lot to offer and should breed very true with the background he has. Deep thick and structurally correct with good growth and plenty of muscle and fat. Mated to a selection of females throughout the sale.

Comments: Ardrossan Nectar is an exciting new sire we have brought in from Australia. We first viewed Nectar in August 2024 at Bannaby Angus and again at Ardrossan Angus in 2025. We consider him the best bull we have viewed in Australia to suit our breeding programme. He has over 750 progeny registered in AUS as well as being used in Cohort 12 of the Australian Angus Benchmarking programme where he has performed very well. He is ranked in the top 1% of the breed globally for foot claw set and top 15% for IMF. We were attracted to his depth of body, volume and capacity in a moderate frame size. He has strong rib fats, and he ranks in the top 1% for body condition score in Australia. His fertility traits are also exceptional and his calving ease and low birth weight make him suitable for heifer mating. He is mated to 3 of the top R2 heifers at lots 3, 9, and 33, representing the first of these genetics available in NZ.

Comments: Kay Jay Mountain Man U737 was purchased by Turihaua Angus at the 2025 KayJay sale for \$46000. We were one of the underbidders on this bull, and were very lucky to be offered a chance to buy a semen share in him. U737 is a very complete and exceptionally well fleshed son of the \$92500 Meadowslea Mountain Man. For us he was the pick of the Mountain Man sons that were so outstanding at both KayJay and Kaharau. U737 displays many of the traits that we expect from the Crump X F540 bloodlines plus added genetics from the high performing Merchiston Steakhouse giving a double cross of Hingaia 469 to the pedigree. U737 oozes do-ability and is the thick deep and square type that thrive in our environment. He has wonderful fertility with a short days to calving figure in the top 1% for the breed. We are very excited to see the progeny from this chap and have the 2 of the feature R3 heifers in the sale mated to him, at lots 73 and 74

Comments: A classic Rainstorme daughter to kick off this 2026 catalogue. As always with his progeny she has beautiful clean shoulders and a terrific front end with lovely neck extension, beautiful balance, and topline. Goes back to L226 and Meat Machine on the dam side. Grand dam was the mother of U275, who we used as a yearling before selling at lot 1 in our 2025 spring bull sale. Rainstorme is now a trait leader for calving ease, milk, and scrotal size, so as you would expect V280 has a terrific spread of maternal and carcass data right across the page! Mated to the yearling team V525 / V211. A top heifer as good as anything we are keeping.

Comments: Another beautifully balanced Rainstorme heifer, again with a lovely topline, width across the loin, clean shoulders, balance, and style - everything we expect from Rainstorme - he never disappoints! Goes back to Meadowslea 159 who was a top son of Te Mania Unlimited as well as Glanworth 0816. Mother had a son in our 2025 Bull Sale sold to Bendigo Station, and a daughter sold to Finnis Farm Angus - she is in the 10-year-old catalogue at lot 142. Figures again are very strong through the maternal and fertility traits with scrotal size and short days to calving reflecting a lot of fertility. A top heifer and mated to our 2024 keeper bull T234.

Comments: Yet another very similar Rainstorme heifer with the same classic front end, style, and neck extension. A nicely balanced, clean shouldered, easy doing type. Out of an N166 daughter which is a very good cross with Rainstorme - N166 of course was the sire of Mountain Man. Grand-dam is lot 139 in the 10-year-old catalogue and has bred very well with three sons making the winter sale team, including U522 who was used in the stud. More impressive maternal data with big EMA and massive fats! Mated by AI to U322, a top bull sold in our 2025 sale to Woodstock Station.

Comments: Like peas in the pod these Rainstorme heifers! She is a nicely balanced type once again with the beautiful clean front end paired with a top hind quarter and real width across the loin - just another chip of the old block right here! Mother bred a bull sold to Lamb Hill Station last year, and the grandmother bred a son to Montana Pastoral. Data is very strong again with great calving ease, milk, and scrotal size. V487 is in calf by AI to the very exciting Ardrossan Nectar Q67.

Comments: An outstanding heifer here! This daughter of KJ Meatpack shows all the thickness, depth, and volume the bull is known for. Mother is a nice L226 daughter who bred a heifer sold to The Wolds last year, while the grandmother is a top daughter of the \$100,000 Rangatira 13-38, and has bred a top bull to Rocky Point Station. Plenty of growth from a low birthweight, with IMF to boot. Terrific coat, thickness, head and bone, wonderful matronly type, a really top heifer! In calf to one of the T234 yearlings V152 / V154.

Comments: Another beautiful quality heifer here very similar to the last. Wonderful depth, lovely coat, and depth all the way through. Herself out of a 2-year-old heifer, she has terrific low birthweight and calving ease with very short days to calving, giving that impressive index. Goes back to the G1000 cow, Crump and F540 as well as Turihaua Rhinestone. Grandmother bred a bull sold to the Chatham Islands last year. Sound with everything good about her - a top pick again! Mated to V525/V211.

Comments: Another very thick, big volume heifer here. Lovely quality once again, width across the top, big deep hindquarter. Dam bred a bull sold to Dean Wardle last year, while grand-dam H104 was one of our greatest ever Crump cows - being the mother of stud bulls L226 and M452! Pedigree really is stacked with F540 also in there as well as Rangatira 13-38 and P593, sold to Cricklewood Angus for \$35,500. A strong powerful heifer with a good coat on her. Data shows ample growth, strong fats, and good IMF as well. Mated to the T234 sons V152 and V154.

Comments: A very well-bred heifer to lead in this pen, this time by P674, who's leaving terrific thickness in his progeny. Goes back to Goldwyn 17, Crump, Braveheart, Reality and Meat Machine. Mother bred good bulls in the 2024 and 2025 winter sales. Nice thick deep bodied heifer with real strength and depth to her. Moderate birthweight with outstanding fertility, big fats and IMF which generate an outstanding index. This one is in calf to the Australian bull Ardrossan Nectar Q67 which should be an exceptional mate - this is a real prospect!

Comments: First of an impressive lineup of daughters of Sudeley Bjorn, the Viking son we purchased for his terrific carcass data and strong IMF. This is a nice, thick, deep bodied, easy fleshing heifer with clean shoulders, moderate frame, and a good deep body type. Out of a 2-year heifer herself and has very good calving ease, low birthweight, big fats, and the massive IMF figure we expect of this bloodline. Goes back to P674 who has been breeding very well for us with Meat Machine and a couple of shots of old Crump. Note some white. Mated to the Rainstorme yearlings.

Comments: Another nicely fleshed moderate framed heifer very similar to the last. Mother bred a bull sold to Hamish Blakely. Some real power in the pedigree with G922 (mother of N166, sold to Australia in 2021), Rangatira 13-38, Meat Machine, Lazarus, and Braveheart. Exceptional calving ease and low birthweight, short gestation, EMA, and fats. She has a deep body, is wide across the pin bones and strong through the pelvis area. Clean shoulders, nice neck extension, a good matronly type. Mated to the powerful yearlings V217 and V396.

Comments: This is the first daughter of R646 who is breeding exceptionally well for us. Mother M643 is offered at lot 139, has bred a couple of top sale bulls including U522 used in the stud, and is also the grandmother of lot 3. Lovely top line on her, nice neck extension, she's got thickness and depth to her all the way through. Strong growth, good scrotal EBV, very good days to calving, and big fats all combine for an impressive index. Is going to develop into a really good hill country cow with a good strong coat. She is in-calf by AI to Snowstorm.

Comments: Strong, powerful heifer here with a lovely front end, some bone and outlook to her. Out of a 2-year heifer herself who is in this sale at lot 108. Volume and capacity going back to the \$106,000 Kaharau Olympic bull, with Braveheart and Reality crossed in that pedigree with Crump and Goldwyn 17 for good measure. Grandmother bred a heifer transferred to Denali Angus last year. V248 certainly shows real capacity, plenty of spring of rib, and depth of body with plenty of growth. Will make a great cow. Mated to V525 / V211.

Comments: This is a daughter of Turiroa Panther and a lovely easy fleshing type. Nice cover over the plates and real easy doing type. Heifer with quality about her, a lovely top line and good back end. Goes back to old Crump and certainly shows it! Grand dam bred a top bull sold at lot 4 to Andrew Overton in 2021. Good calving ease, low birthweight, and the massive fats we see from Panther. Nice outlook, lovely head, a good heifer. Also mated to V525 / V211.

Comments: Another heifer by the Sudeley Bjorn bull, and out of a 2-year heifer by R646 who is in this sale at lot 111. The great G922 cow, Rangatira 13-38 and Meat Machine are in the pedigree. Nicely put together, moderate framed, well balanced and well fleshed. Low birthweight, good scrotal, solid fats and the plenty of IMF from the sire. A quality matronly type. Mated by AI to T234.

Comments: Plenty of scope and scale about this heifer with strong head carriage. Goes back to Woodbank 7017, Braveheart, F540, and Goldwyn 17. Dam is lot 138 for this sale, she bred a bull sold to Hawkduin Station in 2022 and one to Flagstaff Station in 2025. Top maternal figures with very short gestation, low birthweight, good growth, massive milk, and exceptional fertility. Will develop into a big strong cow. Mated to V525 / V211.

Comments: More scope and scale about this heifer as well reflected in her huge growth figures. Outstanding fertility as well with scrotal size and short days to calving. A Tornado granddaughter, she has F540 in the background and a couple of shots of Braveheart. Mother was transferred to Denali Angus last year and grandmother is in this year-s lot 135 in the R10yr mob. Strong head and bone, plenty of capacity, will develop into a good cow. Nice eye on her, a nice quality heifer. Mated to the Rainstorme sons V108 and V233.

Comments: A heifer by Taimate Roy with plenty of scope and scale about her. Goes back to Crump, Meat Machine and some good old blood down the bottom line. Mother bred T382, sire of a number of heifers in the catalogue, and later sold to Brian Butler. Top figures right across the page with low birthweight, good growth, moderate cow size, top fertility, and big fats which combine for a very sharp index. Upstanding and clean through the shoulders with volume and capacity. Mated to V525 / V211.

Comments: Lovely head carriage and capacity about this next heifer. Sire is T300, a son of \$106,000 Kaharau Olympic, and she is out of a 2-year heifer. Double bred to Reality through both Olympic and Lazarus and also double bred to Crump with Goldwyn 17 in there too. Grandmother bred S132, a top bull transferred to Martin Farming Angus for \$14,000 where he is having a big impact. Upstanding, well put-together heifer with plenty of spring of rib. Mated to Snowstorm which will give some real data.

Comments: This is a daughter of the Rockley bull we purchased for his incredible fertility data, and out of a Crump cow going back to F540. As you'd expect her own fertility figures are terrific with very short days to calving, which coupled with short gestation, low birthweight, big fats and impressive IMF makes for an impressive spread of data. Dam bred a top bull sold to Luke Scragg in 2024, and grandmother is a top F540 cow transferred to Albert Hill Angus in 2024. Nice well balanced, upstanding heifer again with plenty of frame, length, and scope. Mated to the T234 sons V152 and V154.

56%	34%	57%	54%	59%	59%	54%	53%	

Comments: Another nicely balanced, free moving heifer with plenty of scale and capacity, width across the top, and a good backend. Sire S491 was a P700 son sold to Glen R Angus for \$18,500, and she is out of a 2-year heifer by Q178 who is leaving real quality in his progeny. A clean shouldered, upstanding, good type. Very strong growth figures, huge fertility, big fats and exceptional IMF should make her progeny hit those grades. Mated to V525 / V211.

60%	39%	60%	59%	64%	63%	58%	58%	

Comments: Nice thick type of heifer to lead in this pen of chunky, medium-framed types with an epic pedigree. A granddaughter of P593, sold to Cricklewood Angus in 2020, and out of a top cow transferred to Ruanui Station last year for \$4,600. Grandmother H107 is the mother of Meadowslea Mountain Man, sold to Kayjay Angus for \$92,500 in 2023! That old cow is also the grandmother of 2025 stud sires U181 and Q524, and she was transferred to Glengyle Angus in 2022 as a 10-year-old. Figures show huge growth with short days to calving and big fats. Plenty of width across the top, strong hindquarter, good strong coat, good head and bone. Another one mated to V525 / V211.

Comments: Another daughter of the Rockley sire showing very nice easy fleshing and clean shoulders. Fertility figures are terrific again with exceptionally short days to calving and a big scrotal size, which is reflected in that outstanding self-replacing index. Out of an F540 daughter who is still in the herd having missed the sale as a 10-year-old. Big fats, plenty of IMF, and low birthweight as well. A good upstanding type of heifer. Mated to V152 / V154.

Comments: Nice moderate framed heifer once again with good coat and depth of body. Compact, square, easy doing heifer with a good coat. By P525 - a top bull of his year used in the AI programme, and going back to Lazarus. Grand-dam M511 is lot 131 in the 10-year age group and had a top son by Rainstorme last year who we used in the stud and sold to Verity Farms. Data shows low birthweight followed by very strong growth. In-calf to the Rainstorme sons V108 / V233.

Comments: Nicely balanced, moderately framed daughter of N166, the sire of Mountain Man. Mother bred a top bull we used in the stud as a yearling and sold to Neil Wilcox in 2024. Double bred to old Crump with Infinity on the bottom line. Low birthweight with short days to calving, some EMA, and big fats. Well fleshed with a good coat, a nice type. Mated to the Rainstorme sons V108 and V233.

65%	41%	62%	60%	64%	64%	59%	60%	

Comments: Another nice moderate framed heifer. Square and well fleshed over the top. As you'd expect of a Quartz Q250 daughter she has low birthweight, terrific milk and fertility, good EMA, massive fats and plenty of IMF. Mother is a daughter of Waiterenui Alliance who left them very sound, she has bred a sale bull that went up to Mt Gerald Station and is in the first pen of the 10-year age group at lot 123. Mated to V217 and V396.

Comments: Moderate framed, clean shouldered and well fleshed. A Quartz granddaughter out of a 2-year heifer, and going back to Q178 and Crump. Grandmother bred a top yearling sold to Andrew Donaldson in the 2024 Spring Sale. Strong fertility with short days to calving and good scrotal, and EMA, fats, and IMF indicate good carcass quality. A good easy doing type. Also mated to V217 and V396.

Comments: A top Jupiter daughter out of a Lazarus cow to lead in this next mob of heifers. This is a top pen of thick, chunky types. Lovely quality head and bone with a strong hindquarter. Plenty of depth of body and some real barrel. Mother bred a top yearling sold to Waewaepa in the 2024 spring sale. Glanworth 0816 and Achiever of Kenhardt feature further back in her pedigree. Exceptional short days to calving with a very moderate cow weight, big EMA and fats all contribute to a terrific self-replacing index. Should be a fantastic mate to the Ardrossan bull. A top pick!

Comments: Goes back to the \$35,000 Woodbank 7017 bull with Crump and Goldwyn on the bottom line. Dam bred U357 sold at lot 6 to Bevan Wilson last year, and the grandmother bred a really good bull sold to Reece Whitelock in 2023. Has wonderful quality about her head, good bone, and depth of body. Terrific calving ease and low birthweight, heaps of milk, good fertility, and a tonne of IMF. Another top mate -this time to Snowstorm.

Comments: Another very good daughter of Sudeley Bjorn, out of an R2yr heifer by Quartz Q250. Mother was also out of an R2 heifer. Clean shoulders, plenty of calving ease, low birthweight, big fats, and plenty of milk. Scanned strongly for IMF as you-d expect with Q250, Viking, and Goldwyn 017 in there. Nicely balanced and upstanding. Note some white. A good quality mate for the T234 sons.

Comments: Lovely deep bodied heifer here to lead this pen of thick, chunky types. A daughter of T191 who has left terrific thickness in all his progeny - he was sold to Ratanui Angus in 2024. Goes back to Woodbank and the great Crump cow K944, who was sold to Albert Hill Angus in the 2024 sale for \$4,700. K944 was the mother of Meadowslea Quattro Q347, sold to Glen R Angus for \$32,000. Terrific short days to calving indicates fertility, big fats, strong IMF and a top index. Strong head and bone, lovely quality about her, and should be a great mate for the Rainstorme sons V108 and V233.

Comments: Good breeding to this thick, deep bodied daughter of R650. Goes back to the \$100,000 Rangatira 13-38 and out of a cow by Crump who bred a good bull sold to Hamish Blakely and a heifer transferred to Stoneburn. Moderate efficient cow size, short days to calving and big fats indicate she should handle the hill and there is IMF there as well. Great balance and topline to her, another quality heifer who should be a great mate to V217 / V396.

Comments: Nice feminine daughter of Q250 with great depth of body and a nice topline once again. Quartz-s customary calving ease, low birthweight, milk, fertility and fats are all apparent here. Mother is a great old Glanworth 0816 cow who bred a good son sold to Lamb Hill Station last year. Piko Burn Char and the great cow A300 are deep in her bloodlines. Deep through the ribs with width across the top - should be an excellent mate to Snowstorm.

Comments: Turihaua blood on both sides of the pedigree here with Rhinestone and Crump. Nice upstanding heifer with a great topline, plenty of depth, and very well-balanced. Dam is lot 126 in the 10-year age group this year and bred a daughter transferred to Okaka Angus, while grandmother bred a bull sold to Josh Jamieson and was transferred to Albert Hill Angus as a 10-year-old. Low birthweight on the page with moderate cow size, top fertility, fats, and IMF. Clean shoulders with some style and a nice pullup. Mated to the top Rainstorme sons V108 and V233.

Comments: Another very well-balanced heifer, this time by Sudeley Bjorn and out of a Rangatira 16209 2-year heifer. Grand-dam did her full time at Meadowslea and was sold in the 2024 sale as a 10-year-old. Top calving ease, low birthweight, good scrotal size, EMA, and fats. Another strong coat with an equally good hindquarter, depth, thickness and volume. Mated to the solid T234 sons V152 and V154.

Comments: Very similar cut of a heifer, this time by P700. Has the same clean shoulders and upstanding outlook, and the good IMF we expect of this bloodline. Goes back to Crump on the dam side. Grand dam bred a top old cow sold to Matukituki Station in 2025. Very strong coat with some depth and thickness. Low birthweight, terrific fats, and the IMF we always get from P700.

Comments: Another nice upstanding heifer with a beautiful clean shoulder and lots of calving ease. Goes back to the Crump bloodline through Panther with Meat Machine and a couple of shots of Reality in the pedigree too. Mother was transferred to Benatrade Angus last year as a 10-year-old. Strong calving ease, short gestation, low birthweight and positive fats come from Reality. Nice outlook with some balance and style about her. Mated to Snowstorm which should double up all those maternal traits.

Comments: Plenty of scope and scale about this Turihaua Jupiter daughter. Goes back to M564 on the dam side which brings some real performance with efficient cow size, top fertility, muscle, and fats contributing to an impressive index. F540, Glanworth 0816, and the legendary G1000 cow are in behind her. Nicely balanced with depth of rib and a good hindquarter. A nice matronly type mated to Meadowslea Snowstorm

The Meadowslea hill-country type

Visual appraisal is still very important for selecting cattle to perform in hill - country

MASCULINE TRAITS - A strong head and jaw and thick neck indicate high levels of libido, testosterone and reproduction efficiency

NECK LENGTH - A thicker necked animal matures and reaches puberty earlier and has more libido

A longer neck indicates a higher maintenance animal that is slower to reach puberty and re-breed

HEART GIRTH - Large heart girth is an indicator of vigor and easy keeping ability

Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well on tussock

RIB FAT - Strong rib fat covers are the essential energy store for adverse conditions.

They indicate easy-doing and finishing ability and are directly related to increased fertility in both heifers and cows.

STRUCTURAL SOUNDNESS, FEET AND BONE - High country cattle cover large distances over rugged terrain so a strong skeleton is essential

HIDE - a good thick skin and coat is essential in the cold harsh environment

FLANK - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency

Higher flanked animals tend to be flighty, are higher maintenance and take longer to finish on grass

SCROTAL SIZE - Larger scrotal size at 12 months indicates daughters will reach puberty earlier, be more fertile, and re-breed early every year.

BRED FOR THE HILL COUNTRY

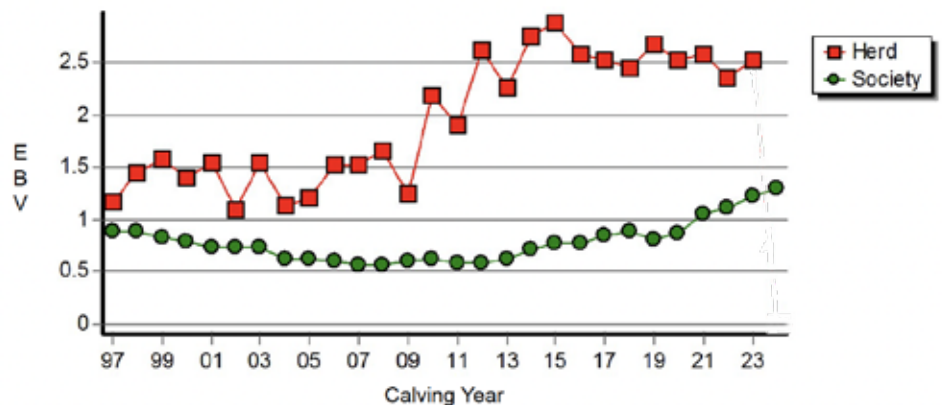

The development of the Meadowslea hill - country type has been the result of 25 years of selecting animals that perform the best in our hash hill country environment. Cows that can winter easily on the hill without supplements, stay in good order, calve easily and get back in calf early every year for 10 years has been the focus of our breeding programme. By putting pressure on cows to winter on native hill blocks it quickly became apparent that some animals could manage well in this environment and would easily get back in calf the next year, while those that struggled would be too light going to the bull, and either calve later each year, or come through dry.

Those that were dry or were not holding their condition well enough were removed from the stud herd, while the "easy-doing" types thrived and passed their genetics on to the next generation. It was clear that it was the cows with good fat covers going in to the winter that were consistently performing the best in our environment.

Ultrasound scanning is performed on all yearling bulls in early spring, and on the heifers in the autumn. For us, the most important data is the rib and rump fat cover measurement - we have found these strongly correlate with those easy doing characteristics, and we now put a lot of emphasis on this when selecting bulls to use and heifers to retain. This is reflected in Meadowslea having some of the highest fat EBVs on the Trans Tasman Angus Cattle Evaluation.

These great positive fat EBVs in the Meadowslea herd have come about simply by selecting animals that suit the hill country environment.

Carcase Rib Fat (mm)

Graph showing improvement in fat EBVs at Meadowslea while running the herd on hill country, compared with Australasian average. From TransTasman Angus Cattle Evaluation, April 2023.

■ Meadowslea herd
● Australasian herd average

The average rib fat EBV for all the females on offer ranks in the top 25% for the breed in NZ, while their Short days to calving EBV ranks in the top 30%

Comments: Another daughter of Sudeley Bjorn, out of a 2-year heifer going back to Turihaua Rhinestone from where she gets the good coat and strong head. Crump and Achiever of Kenhardt in behind her as well. Grandam produced a top yearling sold to William Cooper-Higgins last year. Big scrotal size, big fats, and a lot of IMF on the page. Thick, deep, square, moderate framed and will make a great hill country cow. Mated to V152 and V154, the T234 sons.

Comments: Beautifully fleshed, moderate framed heifer here with a strong head, clean shoulders, and real width across the top. A Q250 granddaughter, showing the low birthweight, terrific fertility, big fats, and IMF he leaves. Out of a 2-year heifer by Q178 from where she gets the head and width - a good cross. Strong hindquarter with depth and thickness in a moderate frame. Mated to V217 and V396.

Comments: Nice rein of neck to this daughter of R578, going back to the Woodbank bull, and with Mountain Man-s sire N166 on the bottom line. Grandsire K853 came through in the R10yr age group 2 years ago and was sold to Sarah Catherwood. Crump, Glanworth 0816, F540, and Braveheart all feature. Plenty of growth about her with stretch, style, balance, and outlook. Good type. Mated to V217 and V396.

Comments: Another compact daughter of Sudeley Bjorn. Out of a 2-year-old heifer and back to Rangatira Rebel from where she gets her bone, with Reality in the background too. Grandmother bred a top bull sold to Reece Whitelock. Good scrotal size, ample growth, and scanned very well for IMF. Nice upstanding heifer with plenty of width over the top. Well put-together, well-made heifer. Mated to V152 and V154.

Comments: A Quartz Q250 granddaughter out of a 2-year heifer going back to the Rangatira 16209 bloodline. Grand dam bred a top bull U291, used in the stud before being sold to Rocky Point Station at lot 9 in our 2025 bull sale, with another bull R676 sold to Willowstone Angus. She also bred Q460, a top R4yr cow transferred to Jade Park Angus in Australia for \$3,600 in 2023. Nicely put together and very sound with clean shoulders, and a nice topline. Strong muscle, easy-doing fats and good fertility. Mated to Snowstorm.

Comments: Another nice, moderate framed, easy doing type of heifer. Mother is a nice moderate K703 cow who has bred three sale bulls so far and grandmother was a legendary old cow who lasted 15 years in our system and bred retained stud sire J479. Well fleshed and good calving ease with very short gestation and low birthweight - should be a cracking mate for Snowstorm.

Comments: A compact, thick, deep bodied heifer typical of the Turihaua Jupiter daughters. Grand-dam K710 was a Crump granddaughter and the mother of stud sire Meadowslea Quartz Q250, she was sold for \$3,100 as a 10-year-old in 2024. V278 has calving ease, low birthweight, fats, and exceptional fertility ensuring a top SRI. Square shape with a very easy doing type, great mate to the Rainstorme yearlings V108 / V233.

Comments: Clean shouldered heifer here with terrific calving ease. A granddaughter of N166, sire of Meadowslea Mountain Man, with Rangatira 16209 on the dam side. Mother has bred a bull sold to David Stodart and a heifer transferred to Kana Valley Angus. Calving ease, low birthweight, masses of fat, easy doing type, and a good topline.

Comments: A daughter of T191 who has left them thick and strong across all his progeny, going back to F540 and the G1000 cow. Mother bred a sale bull last year and grandmother transferred to Denali Angus in 2023. Low birthweight, very short days to calving, and massive fats. Good head and bone, real depth of body, and a very strong mate for Snowstorm.

Comments: Top heifer here to start this feature pen of R3yr heifers. U205 is by the highly regarded Taimate Roy. Very sound stylish heifer with a great topline and outlook to her. Low birthweight, plenty of growth, plenty of muscle, and strong indexes. Mother bred a top bull sold to Neil Wilcox in 2024. In calf by AI to the top Kayjay U737 bull which should be a cracking mate for her!

Comments: Another top heifer here, this time a daughter of Rainstorme, showing all the attributes he consistently leaves in his progeny. Terrific clean shoulder and stylish front end showing the terrific calving ease he is renowned for. Goes back to Crumble on the dam side. Mother has bred 3 sale bulls and has another daughter in the sale at lot 115, and grandmother bred a very good yearling sold to Peak Hill. Strong growth, efficient cow size, and plenty of muscle. Also in calf by AI to the top Kayjay bull!

Comments: Another powerful daughter of Rockley, with the same incredible fertility figures. Goes back to Crump and F540 again. Mother was sold to Hawkdun in last year's sale, and the grandmother is the mother of stud sire S160. Very good index figures coming from calving ease, short gestation, and terrific fertility. Strong topline, powerful head and bone. Mated to our 2025 keeper bull U181.

Comments: A daughter of the \$106,000 Kaharau Olympic, out of a cow by Meat Machine with Braveheart and F540 in the pedigree. She shows all the breeding of those two well-known bulls. Dam bred a top cow sold transferred to Ruanui Station last year for \$4,100. Grandmother bred a top bull Melrose for \$17,500. Nice growth pattern with very strong rib and rump fats, beautiful clean shoulder, very nice topline. A very smart heifer - quality throughout. Mated to U181 again.

Comments: Daughter of M564, going back to the great G1000 cow, and out of a daughter of Crump who is breeding well, with two sale bulls so far plus a top yearling V216 we used in the stud this year. Good old bloodlines on the bottom line - double bred to Hingaia 469. Plenty of growth from a moderate birthweight, short days to calving, and scanned with exceptional muscle. Plenty of fat and IMF too. A lovely easy doing type with clean shoulders and a good strong head. Mated to U181

Comments: The last direct daughter of old Goldwyn 017, and out of a cow by P700 which combines our two high IMF bloodlines. Meat Machine and Crump further back. Mother had a daughter transferred to Denali Angus last year. Nice low birthweight followed by good growth, terrific milk, lots of easy doing fleshing and exceptional fertility which drives that top index. Mated by AI to Tangihau.

Comments: Another Q250 daughter, going back to Ratanui Lad, Glanworth 0816, and the great A300 cow so you can be assured she'll be easy fleshing. Mother did her 10 years and was sold as a 10-year-old last year - she had bred very well with a daughter transferred to Kana Valley Angus, and a couple of sale bulls including T206, transferred to Ratanui Angus. Nice moderate birthweight, massive milk and fertility, powerful muscle and big fat figures. Another good sound type, and again mate to U181.

Comments: A daughter of the \$106,000 Kaharau Olympic. Another quality heifer to finish this pen of moderate, well fleshed females. Moderate birthweight, deep bodied, easy-fleshing type. Good calving ease, massive fats, and a lot of IMF as well. Dam H108 is still here as a 14-year-old and is the grandmother of Quartz Q250. Granddam F530 was transferred to Helmsdale Angus and was the mother of stud sire P556. Beautifully balanced, well-made heifer. A great mate for Tangihau.

Comments: A special entry to start the R4yr offering - the last daughter born by the legendary F540. A very strong pedigree going back to Rangatira 16209 and Braveheart on the dam side. A classic F540 daughter. Mother bred a good yearling sold up to The Muzzle. Deep, thick, square and easy fleshing. Short gestation, low birthweight, strong fertility, great fats, and a terrific mate for the top breeding Turihaua Tornado / V338.

Comments: A daughter of Turihaua Tornado this time, and another top heifer. Tornado leaves them so consistently sound. Mother bred two sale bulls including U434, used as a yearling and sold to Brian Butler in 2025, plus another daughter at lot 69 in this catalogue. Nice calving ease with low birthweight, plenty of muscle, and strong fats showing her easy doing attributes. In calf to the exciting new sire Kaharau Utopia.

Comments: Another deep bodied, moderate framed cow, this time sired by P593, the bull sold to Cricklewood Angus for \$35,000 in 2022, and back to Waiterenui Alliance. Mother is a 10-year-old in this sale at lot 123 and grand-dam bred a yearling sold to Okaka Angus. Nicely balanced type with easy fleshing once again. Moderate birthweight, efficient cow size, and strong milk figure. Scanned with exceptional IMF as well as big fats. Another in calf to Kaharau Utopia. Potential here!

Comments: Deep bodied, easy fleshing young cow here once again. Goes back to Meat Machine and shows the real strength of hindquarter he left with Crump and F540 in there too. Dam is also the mother of lot 87. Grand dam has bred well with two sale bulls plus keeper T234 and V525, used to follow up AI in the heifers this year. Good muscle, exceptional rib and rump fats, and very strong IMF as well. Mated to the powerful Tangihau T613.

Comments: Real power in the next pen of scopier types, starting with this Rangatira Rebel daughter. Very strong growth pattern, lovely topline, real strength of head and bone coming through from the sire-s prefix. Dam L228 was sold to The Wolds as a 10-year-old and has another daughter in this sale at lot 84. Grand dam bred a top bull sold to Peak Hill in 2020. A cracking mate to Rainstorme / Snowstorm.

Comments: A top pedigree here - sire N166 also sired \$92,500 Meadowslea Mountain Man. Dam is a Lazarus daughter and one of the top cows of her year. She bred U202, a top bull used heavily as a yearling and sold to Stern Angus in 2025 for \$18,500. Grand dam was also a top cow who did the full 10 years selling in our 2025 female sale, and bred U274, a top bull sold to Corey Roulston in 2025 for \$16,500. Growth at the top end of the scale, good easy-doing fats, and some real potential here. Another top mate to Rainstorme / Snowstorm!

Comments: Another top heifer to complete this pen. Sired by Q158 who went back to Reality and F540, and out of a cow by Crump. Good strong growth with scale and capacity about her. Short days to calving and good fats as well. T278 is the mother of V133, a Rainstorm son used in the stud this year. Her mother has bred good bulls to Melrose and Waewaepa, and grandmother bred bulls to Rocky Point and Nat Small. Has a lovely topline and quality throughout. In-calf to Tangihau T613.

Comments: A daughter of Timperlea Quain, going back to Lazarus, and to Crump, Red Oak 378, and Meat Machine on the dam side. Mother M498 bred P599, sold for stud to Kaiwara Angus for \$18,500, and is lot 145 in this sale. We expect heaps of calving ease with low birthweight, plenty of muscle, strong fats, and scanned with good IMF. She weaned the heaviest calf in the mob this year. Clean shouldered upstanding type. In-calf to the powerful R646.

Comments: Another nice, moderate framed type by R572, a Lazarus grandson. Mother has another daughter in the sale at lot 89 in the R3 age group, and grandmother has a daughter in this pen - lot 112. Nice balance and style. Scanned exceptionally well for IMF. An exciting mate for the new Kenhardt U123.

Comments: Well put-together R646 daughter here with strong growth and a lovely topline, typical of the bloodline, and excellent fertility giving a nice index. Goes back to Meat Machine. Grand-dam bred bulls sold to David Stodart, Peak Hill Station, and Rocky Point Station. T284 has a daughter in the sale at lot 15. Another great mate to Kenhardt.

Comments: A third daughter of Jupiter showing just how consistent they are! This time goes back to Ratanui Lad. Low birthweight with very efficient cow size, big EMA and plenty of fat giving a solid index. Weaned a very good calf this year. Another deep bodied, easy doing type and scanned with incredible IMF, and also in calf to R646. Another really good, efficient type of cow. Also mated to R646.

Comments: Terrific 10-year-old cow to start the offering. A daughter of K018, going back to old Goldwyn 017. Has length, scope, scale and capacity and is very sound. Great balance and style about her. Scanned well for IMF and has very strong growth, top fertility, and big fats as well. M410 bred Meadowslea Thunderstorm, our lot 1 bull in 2025 sold to Delmont Angus for \$36,000, and she is mated back the same way to Rainstorme this year! She has also bred another good sale bull sold to Carrick station and has a good daughter retained in the herd, who bred a son used in the stud this year as well as lot 81 in this sale. Her own mother K743 was transferred to Albert Hill Angus in 2024. A top cow in every way!

Comments: Beautiful 10-year-old daughter of F540 with real style and balance about her. Low birthweight is followed by strong growth, efficient cow size, massive milk and scrotal, strong fats, and impressive IMF. Length, scope, depth and capacity. Has produced 9 calves in 8 years, including a set of twins as an R3 heifer, both of which were retained in the herd! Bred P558, sold to Piko Burn Angus in 2020 for \$18,000 as well as a top daughter sold to Hokianga Angus for \$7,100 in 2023. Mated to our 2024 keeper T202.

Comments: Another beautifully balanced, deep bodied, thick, wide, roomy cow. By Waiterenui Alliance back to Kaharau 558 and very sound as we-d expect of that cross. Good calves every year including a son used in the stud as a yearling and a good sale bull sent up to Mt Gerald plus a heifer at lot 31 in this sale. Her mother bred a yearling transferred to Okaka Angus. Terrific rib and rump fats indicate easy doing ability with plenty of IMF and another massive milk figure. A very exciting mate to the new Kaharau Utopia.

Comments: By a son of Crump out of a cow by Goldwyn 17 so top breeding again. Daughters transferred to McFadzean Angus and Okaka Angus plus a couple still active at Meadowslea, and another heifer at lot 45 in this sale. Her mother was transferred to Albert Hill Angus as a 10-year-old. Strong growth, very short days to calving indicating fertility, and IMF combining for a good index. Wide across the top with a good backend. A cracking mate to Rainstorme / Snowstorm.

Comments: A daughter of Ratanui Lad, going back to Turihaua Crumble with Kahika Tiger in the background. Another beautifully balanced, deep bodied cow. Strong hindquarter, clean shoulders, and well put together. Calving ease and low birthweight with positive fats and plenty of IMF again. A daughter was transferred to Stoneburn Angus in 2023, and her mother did 13 years on the hill for us. Mated to Rainstorme again followed by Snowstorm.

Comments: Another direct Crump daughter going back to the Australian bull Drambuie. Lovely deep cow with big volume and a really strong coat. Calving ease, low birthweight, and exceptional days to calving along with big fats ensure a top index. Had a good son sold to Tara Farm Trust and has a daughter going well in the herd, while her mother lasted 14 years for us. Beautifully balanced and again mated to Rainstorme / V133 / V287 / Atahua.

Comments: Well balanced and well put together again, this time by Waiterenui Alliance with Crump on the dam side. Shows that great Crump coat and classic topline. Plenty of muscle here, very well balanced and a cracking mate to Kaharau Utopia.

Comments: Nicely balanced cow to start this pen of moderate framed, easy doing types. This is a daughter of Kayjay I36 who went back to Braveheart, with a very good maternal pedigree featuring Glanworth 0816. Has bred five sale bulls to Jude Hurdell, Mt Gerald, KJ Black, and two to Waewaepa with a son used in the stud and another daughter transferred to Picton Park Angus. Mother was transferred to Wether Hill Angus back in 2021. Thick, deep, square cow with a strong hindquarter, mated to Rainstorme / Snowstorm.

Comments: A daughter of J579, back to the great Glanworth 0816 again. Moderate frame, deep body, clean shoulders, and a good topline. Low birthweight is matched with terrific fertility traits with huge scrotal and short days to calving. Has had a son sold to Bendigo Station, a daughter transferred to Ferris Farms Angus, another daughter retained, and a top heifer offered at lot 2 in this sale! Another good mate to Rainstorme / V133 / V287 / Atahua.

Comments: A daughter of K703, from the Meat Machine bloodline, and back to Goldwyn on the dam side. Nice moderate birthweight cow with plenty of muscle, easy doing fats, and strong IMF ensuring a good index. Bred a good bull sold to Peak Hill Station in 2021 and is the grandmother of U322, a top bull sold to Woodstock Station for \$17,000 in 2025 and used in our AI programme this season. Mated to the Rainstorme sons W210 / W216.

Comments: Nice thick, moderate framed K703 daughter to lead in this final pen of efficient thick types. Back to Red Oak on the dam side. Good topline, well balanced and extraordinarily strong in the rib and rump fats as we expect of this breeding. Bred P599, transferred to Kaiwara Angus for \$18,500 in 2020, and on display at their 2025 bull walk. Another top son sold to Brian Butler, and a daughter of hers offered at lot 107 in the R4yr age-group in this sale. Produced the heaviest calf of the age group this year showing how efficient moderate framed cows can be. A cracking mate for Tangihau.

We offer 2 packages, each totaling 5 embryos from the NZ record price Angus cow Meadowslea G1000, and sired by Kincardine Rainstorme R25. The embryos are qualified for NZ only and are stored at Xcell Breeding in Rangiora.

G1000 was sold in our 2021 Female Sale to Ballanee Angus, Australia, for a NZ record price of \$16,050. She has been flushed to Rainstorme, producing embryos for export to Australia, as well as a limited number for the NZ market. She is now 14 years old and has a naturally conceived heifer calf at foot, sired by her grandson Meadowslea Quartz Q250. G1000 is a beautiful sound cow with exceptional muscle and EMA. All her descendants have inherited this very strong muscle, so it was no real surprise when she was recently genomic tested and her EMA jumped from +7 to an incredible +13.3, ranking her in the top 1% in NZ. We think Rainstorme is the perfect mate for her, with his industry-leading calving ease, his efficient mature cow weight, and his own exceptional EMA.

Meadowslea G1000 pictured May 2021 at 10yrs old.

Meadowslea G1000 pictured Feb 2025 at 14yrs old.

Meadowslea Snowstorm U270

Snowstorm was retained in the stud in 2025 after being used as a yearling. He was the standout son of Rainstorm's first year progeny and out of a great Crump cow. The Rainstorm X Crump pedigree was exactly what we had in mind when purchasing Rainstorm for \$81000, and it has proven to be an outstanding cross. Snowstorm has an exceptional spread of data for efficient sustainable hill-country production. Snowstorm is a very exciting prospect and has been widely used in AI programmes in both NZ and AUS. He features as a mating sire with some of the top females on offer.

Turihaua Crump E5

(born 2009) Recognised as one of NZ's most influential and long-lasting sires with over 450 progeny in 21 herds in both NZ and Australia. His daughters have exceptional fertility ranking him as a trait leader for short days to calving.

Sons and Grandsons selling up to \$92,000 for studs across NZ.

He has a major influence on this sale, with daughters on offer, as well as appearing in the pedigree of most of the offering in the catalogue. His bloodline ensures our females have structural soundness, fertility and longevity, making them highly suitable for the hill-country environment.

Meadowslea F540

(born 2010). Our most influential home-bred sire with over 300 progeny in 11 herds in NZ and Australia. He has very strong maternal and fertility traits, with industry leading short gestation, low birth weight, milk, short days to calving, Rib and Rump fats and IMF. His longevity ensured he lasted active in the herd till 14 years of age.

He has a major influence on the sale, with daughters on offer, as well as having numerous outstanding descendants throughout the offering.

The Crump X F540 bloodlines are legendary and have been instrumental in forming the consistency of type the Meadowslea herd is known for.
